ACKNOWLEDGMENTS

A successful completion of this piece of work reminds me of times of constant support, encouragement and motivation by my fellow people and I owe gratitude to each one of them for having helped me in every possible way.

To start with, first and foremost I owe it to my supervisor Dr.Harpreet Kanwal Chabba, Associate Professor, Department of Psychology, Panjab University, for I am completely indebted to her for the concept and the idea behind this thesis.

Words are far less to express the gratitude for Late Dr.Natash Inder Shergill, a beloved teacher of my undergraduate years, for motivating me and having faith and confidence in me that I could take up this assignment. Miss you Mam!

I also would like to take an opportunity to thank my first ever boss at work under whom I learnt the principals of work culture, Prof. Savita Malhotra for her encouragement during the initial days of my Ph.D. I am also grateful to Prof.Adarsh Kohli and Dr.Ritu Nehra for all the practical support they lended in times of need.

I am also obliged to Raghuvir sir and Late Suresh sir, the laboratory staff and Santosh Mam, Library Incharge, Department of Psychology, Panjab University, for being affectionate and treating me like their own children and always keeping an open hand in letting me access any study material.

It’s my privilege to thank Ranjana Mam, Supriya Mam and Wafia Sir the concerned heads and teachers of the schools from where I collected the data.

I also appreciate the help of Mr.Surinder Bajaj and his wife Mrs.Seema Bajaj who helped me in the typing of the thesis. I am also grateful to Dr.Suresh and Mahindru sir of Department of Statistics for giving me insights into understanding the interpretation of my results.

I also want to extend a heartfelt thanks to Ishwar Bhaiya and Rajneesh Bhaiya who were instrumental in developing the software of my thesis experiment. Beyond everything that my father did to enable me to accomplish this dissertation a special thank you to him for having arranged these people for me.

On the personal front I would like to thank all my kith and kin who have helped me emotionally in my times of stress, yet there are few people without whom
I would not have been able to sail through. I thank Garima di for being there always, Ankita for helping me in my office work during the initial days of my Ph.D., Karthik for all the support, Abhishek sir for helping me with the technical problems towards the end of the thesis, Gayatri for all the happy stress busting times and encouragement to finish it up as soon as possible and my brother Aaditya for cheering me up every time I was low.

I also want to say a humble thank you to a friend and a fellow doctorate student Sharan for the helping hand that she offered and which meant a sea of help for me. I would also like to extend a thank you to Sakshita.

Above all I would like to thank my parents for enabling me to do this research. I also thank all the students who consented to be the subjects of my study without whom it would not have been possible to even envisage this research.
