ACKNOWLEDGEMENTS

I wish to express my deep sense of gratitude to my esteemed supervisor, Dr. M. R. Khurana, Department of Economics, Panjab University, Chandigarh, for his most valuable guidance, incessant support and encouragement throughout the course of completion of this study. He spent a lot of time in reading the drafts, examining and illuminating the issues taken up for examination in this study and suggesting highly useful and extensive improvements.

I am thankful to Professor H. S. Shergill, Department of Economics, Panjab University, Chandigarh, for the fruitful discussion I have had occasionally with him. His incisive comments have been of immense use in dealing with the issues taken up for examination in this study. My grateful thanks go to Professor S. L. Kansra, Chairman, and other faculty members of the Department of Economics, Panjab University, Chandigarh, for encouraging me in more than one way.

For the keen interest shown by Dr. Rassul Mohammad Rezai of the Department of Agricultural Economics of Tabriz University and Dr. M. G. Yousefi of the Department of Economics of Allame Tabatabai University, Tehran, in my research work, I feel indebted to both of them.

I am indebted to the staff members of the libraries of Panjab University, Chandigarh, Rattan Tata Library of the University of Delhi, Delhi, Jawaharlal Nehru University, Indian Council of Social Science Research (both in New Delhi), and Aligarh Muslim University, Aligarh for their wholehearted promptness to meet my frequent requests for research.
material. A special word of thanks is due to Mr. Ved Prakash Bhardwaj of the Economics Department Library for his help and co-operation in searching some research material used in this study. I also wish to express my warm gratitude to many officials of the Ministry of Agriculture, Centre for Agricultural Planning and Economic Studies, Bank Markazi of Islamic Republic of Iran, Statistical Centre of Iran and Plan and Budget Organization who are too numerous to be listed individually but who provided all out help, information and encouragement in the completion of this work.

I take this opportunity of thanking my parents with utmost reverence for motivating me to pursue my research work uninterruptedly. My involvement in this research work has been a good test of patience of my wife and children. And they all, in spite of their having undergone several inconveniences during the course of completion of this study, just passed it.

While I deem it a matter of great privilege to express my sincere gratitude to all these and many others who have helped me in one way or the other in the completion of this work, nevertheless, none of them is in any way responsible for the conclusions drawn in the study as well as for the errors or omissions which may still persist in it.

Hossein Raheli
