ACKNOWLEDGEMENTS

A famous English poet in ‘Stratford upon Avon’ said, “People thy work is incomplete till thee thank the lord and thy master”, which means that a student’s work is incomplete until he/she thanks the almighty and his/her teacher. Sincerely believing in this, before introducing my thesis, I bow my head with ‘SĀ STANGA PRANĀ MAM’ before the Almighty who drove me to climb highest academic echelons. Now I take immense pleasure in expressing my deep sense of gratitude to all those who helped me in completing this thesis successfully. It indeed gives me great pleasure to thank my Research Supervisor Prof. (Rtd.) I. RAMABHADRA SARMA, Department of Mathematics, Acharya Nagarjuna University, presently working as Professor of Mathematics, K L University, Vaddeswaram, for his illuminating, inspiring and thought provoking guidance during the entire period of my academic pursuit. But for his help and encouragement I would not have completed this project well in time and this dissertation would not have seen the light of the day for which I am deeply indebted to him.

Special thanks are due to my beloved teachers, Prof. (Retd.) Y.Venkateswara Reddy, Department of Mathematics, Acharya Nagarjuna University, Prof. (Retd.) N.Ch. Pattabhiramacharyulu, Department of Mathematics, N.I.T., Warangal, Prof. (Retd.) V.
