ACKNOWLEDGEMENTS

It gives me immense pleasure in expressing my gratitude and indebtedness towards my esteemed Teachers and Guides Dr. G.S. Sodhi, Reader, Panjab University, Chandigarh and Dr. Sunil Dutt, Sr. Lecturer, Technical Teachers’ Training Institute, Chandigarh for their scholarly guidance, direction and encouragement during the progress of this study. Their co-operation, observations and valuable suggestions have encouraged and enabled me to complete this project and achieve the quality of this presentation.

I am grateful to my revered father Dr. V.K. Kohli, an eminent educationist and former Dean of Colleges, Kurukshetra University, Who took an unmatchable interest in my work and provided me with the kind of support and encouragement that I needed, when I seemed to lag behind.

I express my heartly thanks to Principal Ravinder Talwar, President, Indian Council For Environmental Education for providing me an access to all the facilities of his Institution and giving me valuable suggestions in accomplishing this task.

I also acknowledge the co-operation extended to me by the Principals, staff members and students of various Senior Secondary Schools during the experimentation for this study.

A deep sense of thankfulness is recorded to all friends, colleagues, authors and research scholars whose work have been consulted in writing this dissertation.

In the last, but not the least I am immensely indebted to my wife Anu Kohli. Her helpful attitude and affectionate behaviour had supported me in innumerable ways in accomplishing this task.

Once again, I would like to thank all concerned who helped me in the successful completion of my research work.
