ACKNOWLEDGEMENTS

I would like to express my deep and sincere gratitude to all those who have been instrumental in one way or the other and who gave me the possibility to complete this piece of work fruitfully. To begin with, I would like to acknowledge The Almighty God who has been the Prime Mover in all my efforts and I bow my head in reverence and humility to Him for the blessings that He showered on me yesterday, today and tomorrow and provided me with immense strength, the spirit, the will, the courage to work in the right direction to achieve all the goals in my life.

First of all, I convey my heartfelt appreciation to my venerated supervisor, Professor R. Tewari, Department of Biotechnology, Panjab University, Chandigarh, for his immense help in planning and executing the work. He has always tried to inculcate in me the value of quality work, which can only be achieved after putting in the best of our sincere efforts and hard work. I have always known him as the most sympathetic and principled person. His occasional and timely ‘daant’ as well as stimulating counsel was helpful to a great extent.

Words fail me to express the sense of earnest gratefulness that I feel for my highly esteemed teacher and guide, Professor S. P. Vij, NASI, Platinum Jubilee Fellow, Department of Botany, Panjab University, Chandigarh, for his patience, expert guidance and meticulous scrutinization of my work. I am obliged to him for giving untiring inspiration, encouraging support, unflagging encouragement and direction throughout the course of the study. It has been a great learning experience working under his supervision.

The professional guidance provided by my teacher and guide, Professor Promila Pathak, Department of Botany, Panjab University, Chandigarh, merits volumes of appreciation and heartfelt gratitude for her immaculate guidance, unstinted help, valuable suggestions, creative criticism, and expert evaluation during the course of my research work, all of which helped me to accomplish this challenging task. I am obliged to her for providing me all the tissue culture facilities in her lab and allowing me access to her personal research literature.

I am thankful to Prof. K. Tewari, Chairman, Department of Biotechnology, Panjab University, and his predecessors Prof. R. C. Sobti, Prof. Jagdeep Kaur and Dr. Neeraj Khullar. I owe my sincere thanks to Prof. K. Kohli, Chairman, Department of Botany, Panjab University, Chandigarh, and ex-Chairmen, Prof. S. P. Khullar and Prof. I. S. Dua, for providing the infrastructural assistance and necessary facilities during the course of my research. The infrastructure and lab facilities extended by Prof. M. V. Rajam, Department of Genetics, University of Delhi, New Delhi is worthy of praise. He provided me with the best facilities and a good lab culture. Prof. K. Vasisht, Department of Pharmaceutical Sciences, Panjab University, Chandigarh, also furnished his lab facilities.

The three gems of my life, Urmil, Preeti Walia and Anupama Khullar, along with my brother Neetu have been the main pillars of emotional support for me throughout the tenure of the present work, and have supported me during my most difficult times. Their undying love, affection and moral support have been the main driving force which led to the eventual completion of this piece of work, and also helped me toil hard for so long. During the later stages, Sarika and Pravin helped in a praiseworthy manner and were a great aid in all possible ways. All of them helped me wade through the toughest of times of my life. They never let me feel being alone and away from home.
I avail this rare opportunity to express my genuine appreciation to my cherished and treasured friends, Supriya, Jeesu, David, Nongdam, Minam, Geetanjali, Satwinder, Chadha, Alok, and Roohani who helped me get out of the work-related blues. In particular, my hostel friends and juniors, Monika, Shitami, Geetika, Meenakshi, Seema, Reena Bhandari, Rekha, Gagan, Archana, Anujkshi, and Mahajan. They never let me feel being away from home and gave encouraging company. Though one always prays to be alone in a hostel room, my room-mates, Monika, Kusum, and Gurdeep have always been helpful, especially in bearing with me during April and September. Long time friends, Simrat and Kitty, and their contribution can never be forgotten.

All the support provided by my amicable lab-mates and friends Anju, Sanjay, and Shweta, and seniors, Dr. Ashish, Dr. Jaspreet, Dr. Jagdeep, Dr. Anu Dubey, and Arpita didi is creditable. Lucky has been a support throughout the tenure and has also been my oldest associate during my stay in the Botany department. The help provided by Pri Sir and Anuprabha is also duly accredited. They all always made me feel better during the odd stages of research. The sincere support, kind help, affection and constant encouragement provided by my senior, Sharada didi is creditable and help was lent in every possible manner.

The lab-mates of Biotechnology department, Shaheen, Bassam, Dr. Alka, late Kunjes, Dr. Menaka, Onkar, Dr. Rajan, Sanjeet, Mamta, Naazpreet, Anjkur, Vivek, Gaurav, Prathibha, Phoolia, and Gurdeep were a great help throughout my tenure of work. The lab-mates of Department of Genetics, University of Delhi, South Campus, New Delhi; Maneesh, Riffat, Sandeepa, and Ashwin, gave me all the help and moral support during my stay in their lab. Suresh Sir, Jai Malik Sir, Ashish, Adarsh, Aman, Anupam, Poopa, Preet Kaur, and Vandana, the lab-mates of Department of Pharmaceutical Sciences, aided during my work being carried out in their lab.

I will be failing in my duty if I do not mention the cooperation and timely help offered by Meena Bhaiya, Gurdev Sir, Dev Raj Rana Sir, Hayak ji, Gurdev ji, Vinod Sir, and Mahendru Sir along with the technical and administrative staff of Botany and Biotechnology Departments.

My Mummy and Papa and my brothers, Sandy and Neetu, have always helped and supported me through thick and thin. They always bore with me, whatever the circumstances and conditions, never allowing me to give up. Without their loving support, unconditional love, patience, timely guidance and blessings; nothing would have been achieved in my life. God bless them and I am highly grateful to God for giving me such loving and caring parents and brothers. I would not have been what I am today without them. I want to thank them who always taught me the value of sincere efforts and hard work. To them, I owe my yesterday, today and tomorrow. My brothers were always just a phone call away whenever any emotional or technical help was requisite for completing this stupendous task.

My dear husband, Mandeep Singh Hayar, has been my Rock of Gibraltar ever since we got married and no words can express my indebtedness to him. He provided me all the love and support required and bore with me for a long delay. I appreciate the way he understood me and stood by me and lifted my morale during testing times. The sacrifices he has made for me in every which manner are lauded. I promise to make up for all the lost time.

The work would not have been complete without the blessings and well wishes of all the relatives including daadiji, maasijis, late maamiji and others. My cousin and his family, Gurjeet, Manjit bhaili, Gurmeet and Gurman lent a helping hand in the later phase.
Words are insufficient to owe my gratitude to the support, affection and encouragement bestowed upon me by my mother-in-law, brother-in-law, Harji, and naniji. They also waited patiently for me to return home.

The timely help provided by Chauhan Brothers, Mohindra Printers, and Capital Photo-Lab in providing me with the print-outs is recognized.

Financial assistance from Centre for Scientific and Industrial Research, New Delhi during the course of the current study is duly acknowledged.

Date 11 Nov., 99.

Mandeep Kdur Dhillon
