CHAPTER- 8

BIBLIOGRAPHY
8. BIBLIOGRAPHY

10. Ames BN, Shigenaga MK & Gold LS. DNA lesions, inducible DNA repair, and cell division: three key factors in mutagenesis and carcinogenesis. Environ Health Perspect (1993a); 101(5), 35-44.

15. Antioxidant, anti-inflammatory and phytochemical screening of important plants used as immuno-modulator in indigenous systems of medicine, Thesis (Dr. Govindarajan, PhD, 2005)

35. Brzozowski T, Konturek PC, Ernst H, Stachura J, Konturek SJ & Hahn EG. Gastric adaptation to injury by repeated doses of aspirin strengthens mucosal

47. Chung YC, Chang CT, Chao WW, Lin CF & Chou ST. Anti oxidative activity and safety of the 50% ethanolic extract from red bean fermented by *Bacillus subtilis* IMR-NK1. J Agri Food Chem (2002); 50: 2454–2458.

61. Dinis TC, Maderia VM & Almeida LM. Action of phenolic derivatives (acetaminophen, salicylate, and 5-aminosalicylate) as inhibitors of membrane lipid

66. Ellman G. Tissue sulphhydryl groups. Archives of Biochemistry and Biophysics (1959); 249:7130-7139.

70. Fandriks L and Jonson C. Effects of acute administration of Omeprazole or Ranitidine on basal and vagally stimulated gastric acid secretion and

85. Garrick T, Buack S & Bass P. Gastric motility is a major factor in cold restraint-induced lesion formation in rats. Am J Physiol (1986); 250: G191-G199.

89. Goel RK, Govinda Das D & Sanyal AK. Effect of vegetable \textit{banana} powder on changes induced by ulcerogenic agents on dissolved mucosubstance in gastric juice. Indian J Gastroenterol (1985); 4: 249-251.
90. Goel RK, Sairam K & Rao ChV. Role of gastric antioxidant and anti-helicobacter pylori activities in antiulcerogenic activity of banana (Musa sapientum var. paradisiace); Indian jour of experimental bio (2001); (39): 719-722.

98. Guth P: In peptic ulcer (edn.) Cj Pfeiffer, Mennksgaard, Copenhagen (1971); 221-236.

104. Harborne JB. The Flavonoids: Advances in Research science (1986); Chapman & Hall, London, UK.

137. Kim DC, Kim SH, Choi BH, Baek NI, Kim D, Kim MJ & Kim KT. *Curcuma longa* extract protects against gastric ulcers by blocking H$_2$ histamine receptors; Biol Pharm Bull (2005); 28(12):222-228.

150. Larsson H, Carlsson E, Matlson H, Lundell L & Sundler F. Plasma gastrin concentration and gastrin enterochromaffin like cell activation and proliferation
studies with omeprazole and ranitidine in intact and antrectomatized rats. Gastroenterology (1986); 90:391-399.

158. Lundell L. Elucidation by an H2-receptor antagonist of the significance of mucosal histamine mobilization in exciting acid secretion. J. Physiol (1975); 244: 365-383.

163. Martin A, Bustamante P and Chun A.Micromeritics in physical pharmacy – physical chemical principles in the pharmaceutical sciencs.4th ed., Lippincott Williams and Wilkins, Baltimore (2002); 446-448.

168. Mikhaeil BR, Badria FA, Maatooq GT & Amer MM. Antioxidant and immunomodulatory constituents of henna leaves. Z Naturforsch C (2004); 59(7-8), 468-476.

180. Nagashima R and Yoshida N. There is selective binding of sucrose-sulfate on ulcer lesion. Arzeneium Forsch (1979); 30: 84.

206. Pushpangadan, P. The role of traditional medicine in primary healthcare in science for health, state committee for science technology and environment, thiruvanathapuranam (1995); 24-30.

222. Reite OB. Comparative physiology of histamine. Physiol Rev (1972); 52: 778.

258. St John DJB, Yeomans ND, Mc Dermott FT & De Boer WGRM. Adaptation of the gastric mucosa to repeated administration of aspirin in the rats. Dig. Dis. Sci (1973); 18:881-885.

271. USP 24/NF 19, USP convention, Rockville (1999); 1429.
