ACKNOWLEDGEMENTS

I am deeply indebted to Prof. N. Veeraiah, for kindly suggesting the problem and for his inspiring guidance, constant encouragement and affectionate care throughout the progress of this research work, without whose help this work could not have taken this shape.

I am equally grateful to Prof. I.V. Kityk, Technical University of Czestochowa, Poland for his valuable discussions, and suggestions. I am also highly thankful to Prof. M.G. Brik, Institute of Physics, University of Tartu, Estonia for his help in the interpretation of spectroscopic data of rare earth doped glasses.

I express my gratitude to Prof. A. Moguš-Milanković and L. Pavić, Ruder Bošković Institute, Department of Chemistry, Zagreb, Croatia for their help in recording impedance spectra for the samples used in the present investigation.

I am deeply indebted to Dr. Y. Gandhi who has been helping since beginning of this work. I express my sincere thanks to Dr. N. Venkatramaiah of Pondicherry University who has helped a lot in getting data on several measurements reported in this thesis.
I articulate my heart felt thanks to the faculty members of the Physics Department, Dr. V. Ravi Kumar and Dr. G. Naga Raju for their encouragement.

I express my respect and gratitude to my senior scholars Dr. T. Sri Kumar, Dr. Ch. Srinivasa Rao, Dr. G. Murali Krishna, Dr. G. Venkateswara Rao, Dr. P. Syam Prasad, Dr. G. Sahaya Baskaran, Dr. K. Sambasiva Rao, Dr. N. Krishna Mohan, Sri A.V. Ravi Kumar who have helped me a lot in completing this work.

I also thank all co-scholars of the Department N. Narasimha Rao, N. Ch. Ramesh Babu, P. Naresh, D. Raja, K. Naveen, B. Jayaram, G. Narasimha Rao, A. Radhakrishna, P. Rajnikanth, A. Chittibabu, O. Nagabushanam, T. Sambasiva Rao, T. Kalpana, T. Satyapratima, B. Prasad Rao, A. Baddu Babu, for their co-operation and help in this work. I also acknowledge the help rendered by other co-scholars of our Lab Dr. K. Srilatha, Sri. N. Srinivasa Rao, Sri. M. Sundara Rao, Smt. K. Bhargavi, Dr. A. Padmanabham, Dr. M. Nagarjuna, Dr. M.V. Ramachandra Rao and also express my sincere thanks to all of my friends who helped me a lot during the course of this work.

I am highly grateful to Sri M. Mohana Rao, Director, Sri N.B. Ibrahim, Principal, Sri Siddhartha Educational Institutions, Nuzvid and to all my colleagues for their invaluable help and encouragement throughout the course of this work.
The help extended by all the non-teaching members of the Physics Department, A.N.U. Nuzvid Campus is gratefully acknowledged.

I am also thankful to Mrs. Veeraiah, Chandu and the family members of his Research Director for their well wishes.

I express my best regards to my parents Sri P. Anjaiah and Smt. Samrajyam and also to my elder sister Smt. K. Lakshmi and brother-in-law Sri K. Hanumantha Rao and to my brothers Sri. P. Ramu, Ch. Sudhakar for their moral support and blessings.

I also gratefully acknowledge the financial help received from Department of Atomic Energy and Board of Nuclear Science in the form of JRF in the research project.

Finally, I pray to the Al-mighty GOD for all the abundant blessings and loving care which have made me to submit this thesis within the time.
