TABLES

1.1 Gate control theory; Conditions that open or close the gate 5
3.1 The data for pilot study of cricketers 63
3.2 Mean of the data for pilot study of cricketers in each of group 63
3.3 Central tendency and dispersion statistic for age, body mass, height, body mass index of cricketers 64
3.4 Reflexology treatment on sole of the foot 65
4.1 Central tendency and dispersion statistic for age, body mass, height, body mass index of cricketers in reflexology group 77
4.2 Central tendency and dispersion statistic for age, body mass, height, body mass index of cricketers in placebo group 78
4.3 Central tendency and dispersion statistic for age, body mass, height, body mass index of cricketers in control group 78
4.4 Central tendency and dispersion statistic for age, body mass, height, body mass index of cricketers 79
4.5 Central tendency and dispersion statistic for age, body mass, height, body mass index of cricketers in each group 80
4.6 Means, Standard Deviations and Percentage of disability for cricketers 82
4.7 Means and Standard Deviations of percentage of pain rating index, for cricketers 84
4.8 Means and Standard Deviations of Visual Analogue Scale (VAS), for Cricketers 86
4.9 Means and Standard Deviations of Present Pain Intensity (PPI), for Cricketers 88
4.10 Comparison Between Different Groups and Age, Body Mass, Height and Body Mass Index for Cricketers 90
Comparison between pretest of disability, PRI, VAS and PPI and different groups for Cricketers

4.12 Levene's Test of Equality of Error Variances
4.13 Tests of Between-Subjects Effects
4.14 Estimated Marginal Means of groups
4.15 Multiple Comparisons of difference pre and post-test of disability
4.16 Levene's Test of Equality of Error Variances
4.17 Tests of Between-Subjects Effects
4.18 Estimated Marginal Means of Groups
4.19 Multiple Comparisons of difference pre and post-test of PRI
4.20 Tests of Between-Subjects Effects
4.21 Estimated Marginal Means of Groups
4.22 Multiple Comparisons of difference pre and post-test of VAS
4.23 Levene's Test of Equality of Error Variances
4.24 Tests of Between-Subjects Effects
4.25 Estimated Marginal Means of Groups
4.26 Multiple Comparisons of difference pre and post-test of PPI
4.27 Multiple Comparisons of difference pre and post-test of reflexology and control groups
4.28 Multiple Comparisons of difference pre and post-test of Reflexology and control groups
4.29 Multiple Comparisons of difference pre and post-test of placebo and control groups
4.30 Multiple Comparisons of difference pre and post-test of Reflexology and placebo groups
