APPENDIX-IV
STUDY OF ATTITUDE TOWARDS CHANGE PRONENESS

NAME: 
SCHOOL: 
DATE: 
DESIGNATION: 

Below are given some cartoon pictures. Each picture has two or more persons; one of them is saying something while the others are listening. In the dialogue box, Read what the person is saying, and from the following statements guess what the other person said or thought in response to what he heard. There is no right or wrong answer. Write down, in the blank column, whatever comes to your mind first. Do not leave any picture unanswered:

1) I totally agree. 2) I agree to some extent. 3) I would like to experiment first and then comment. 4) I don't think so.

In my opinion, smart class rooms will make the teaching-learning process more interactive.

I think by using working models, we can make students understand the concepts better.
I think we can make lectures more effective by using a projector.

It will be useful to try new devices in language lab for teaching phonetics.

In my opinion, this method of presenting information is more useful.

I think by showing movies dealing with children's problems, we can sensitise students in a better way.
I believe that the innovative ideas suggested by the researcher will prove useful.

In my opinion, every student should be given basic understanding of using computers.

I think it is important to conduct experiments in the laboratory for better understanding.

A teacher should be innovative and should use new devices and methods to teach in class.
I think it is important to organize workshops and seminars in our schools. In my opinion, digital libraries should be introduced in schools.

I think media should highlight innovative ideas so as to popularize them.

I am doubtful if any of new practices can really make much difference in schools.
