ACKNOWLEDGEMENTS

The research work embodied in this thesis was carried out under the joint guidance and supervision of Prof. V.J. Gupta and Dr. A.D. Ahluwalia of the Centre of Advanced Study in Geology, Panjab University, Chandigarh. I express my sincere gratitude to both of them for their untiring constructive criticism and helpful suggestions.

I am also thankful to Professors S.B. Bhatia and M.N. Sexana who were the consecutive Directors of the Centre of Advanced Study during my research work, for the research facilities provided to me. Professors A.K. Prasad and Ashok Sahni very kindly gave help in photomicrography and SEM work respectively. Besides Dr. Ahluwalia, Dr. Denis Bates, Aberystwyth; Dr. N.S. Mathur, Dr. Trilochan Singh and Dr. (Mrs.) Meera Tewari of WIGH, Dehradun, gave me helpful company during field work. Prof. K.K. Sharma of WIGH, Dehradun took keen interest in my work and gave me invaluable encouragement. I received help in trace fossil studies from Dr. O.N. Bhargava, Director, Geological Survey of India, Chandigarh and Shri U.K. Bassi also of GSI, Chandigarh. 

I would always remain grateful to my teachers of Geology Department, Jammu University and in this context would like to make a special mention of Professors T.R. Sharma, T.R. Bhatia, S.K. Shah and C.L. Munshi. All the friends and colleagues at Geology Department, Panjab University lended valuable help and gave a cheerful company during the course of my research work.

My special thanks are due to Dr. Kuldip S. Chark, Ms. Param Joyti Arora, G. Vallinigam, Asit Jolly, Sunil Kumar Varun, Sunil Bajpai and Ravinder Singh.

It is impossible to adequately express my depth of indebtedness to my revered parents, brother and sisters for the crucial moral support and encouragement. My special thanks to my younger brother Shri Davinder Singh Parmar in this context.

Last but not least, I am highly indebted to Mrs. Darshan Kaur for taking personal interest in elegantly typing this manuscript even during odd hours.
