## Contents

Preface 01

1 Preliminaries 10
   1.1 Introduction to Fluid Dynamics 10
   1.2 Types of fluids 11
   1.3 Some Important Types of Flow 16
   1.4 No-Slip condition of viscous fluid 18
   1.5 Boundary-layer theory 18
   1.6 Flow and heat transfer 20
   1.7 Dimensionless Parameters 25
   1.8 Numerical Methods 31
   1.9 Nomenclature 33

2 Boundary layer flow and heat transfer of a dusty fluid over a stretching sheet 36
   2.1 Introduction 36
   2.2 Formulation and Solution of the Problem 38
   2.3 Heat Transfer Analysis 40
   2.4 Physical Quantities 44
   2.5 Numerical Solution 44
   2.6 Results and discussion 45
   2.7 Conclusions 48

3 Flow and heat transfer of a conducting dusty fluid over a stretching sheet 58
   3.1 Introduction 58
   3.2 Formulation and Solution of the Problem 61
   3.3 Heat Transfer Analysis 63
   3.4 Results and discussion 66
   3.5 Conclusions 68
4 Flow and heat transfer of a dusty fluid near a stagnation point over a stretching sheet

4.1 Introduction 79
4.2 Formulation and Solution of the Problem 82
4.3 Heat Transfer Analysis 85
4.4 Results and Discussion 88
4.5 Conclusions 90

5 Convective flow and heat transfer of a dusty fluid over vertical stretching sheet

5.1 Introduction 99
5.2 Formulation and Solution of the Problem 101
5.3 Heat Transfer Analysis 103
5.4 Results and Discussion 106
5.5 Conclusions 109

6 Flow and heat transfer of a dusty fluid over an inclined stretching sheet

6.1 Introduction 119
6.2 Formulation and Solution of the Problem 121
6.3 Heat Transfer Analysis 123
6.4 Results and Discussion 126
6.5 Conclusions 129
