Acknowledgement

I am extremely grateful to Dr. T.P. Prabhu for suggesting the topic, and for his constant guidance and encouragement throughout the work. I am also grateful to Prof. B.C. Chandrasekhara for the invaluable help rendered by him towards the successful completion of this thesis.

I thank the Director, IIA for providing all the facilities needed for this study. Prof. J.C. Bhattacharyya took a keen interest in this work. I gratefully acknowledge the encouragement given by him and also by Prof. K.R. Sivaraman; both of them protected me from mundane problems and helped me to concentrate fully on research. The time allocation committee generously allotted observing time on the 102 cm telescope. Mr. K. Kuppuswamy, Mr. A. Muniyandi, Mr. M. Appakutty and others offered much help during observations. It would not have been possible to accumulate the data used in this thesis without all this help. I thank Prof. H.W. Duerbeck for kindly providing the ESO data on Nova Scuti 1989 and T Pyx, and Dr. A. Cassatella for providing the IUE data on RS Oph. I also thank them for many inspiring discussions and correspondence.

All the reductions were performed at the VAX 11/780 system at VBO, Kavalur. I thank Dr. R. Srinivasan, Mr. A.V. Ananth, Dr. K.K. Ghosh, Mr. K.N. Kutty and others at the computer centre. Most of the final figures and text were prepared on personal computers at the computer centre at IIA. I thank Prof. A. Peraiah, Dr. K.E. Rangarajan and Mr. Baba Verghese for the ready help provided by them. Availability of unlimited computer time at both these centres have helped in completing this work in reasonable time frame, and to my satisfaction.

I thank Dr. Ashok Pati for inspiration and for several useful suggestions. Thanks are due to Divakara Mayya for his image processing programs, and Dr. A.V. Raveendran for the program to fit truncated Fourier series. K.S. Balasubramanian, Vasundhara Raju, Divakara Mayya and other friends provided the much-needed moral support. I also thank Prof. N.K. Rao, Dr. K.K. Ghosh, Dr. S. Giridhar, Prof. R.K. Kochhar, Dr. R.C. Kapoor and Dr. S.K. Jain for their support and encouragement.

Ms. A. Vagiswari, Ms. Christina Louis, Mr. H.N. Manjunath and other staff of IIA library made books, journals, references and xerox copies readily available. All the staff of the Director's secretariat were also helpful in every respect. Mr. J.H. Inbaraj prepared the line drawings, Mr. A. Elangovan prepared the photo-
graphic prints, and Mr. P.N. Prabhakara made the xerox copies. Mr. D. Kanagaraj, Mr. P. Bose and Mr. M. Subramani bound the copies of the thesis. My thanks are due to all of them. I thank again all those staff members of IIA, Bangalore and VBO, Kavalur, who made it a pleasure to work at the Institute.

Finally, I am immensely grateful to my parents, grandparents, sister, brother-in-law, nephew and other family members for their strong support, encouragement and affection.
