ACKNOWLEDGEMENT

First and foremost I would like to express my sincere gratitude to the Government of India and their various offices and personnel, whose kind assistance and co-operation made my study in India possible. My thanks are also due to the Indian Council for Cultural Relations (ICCR) for the award of fellowship, and to the Cochin University of Science and Technology for giving me admission to the Ph.D. program. During the course of my work I have also received generous help from many quarters and I acknowledge them all with gratitude.

With boundless gratitude and great respect I express my obligation to Dr. K.C. Sankaranarayanan, Professor and former Head of the Department of Applied Economics, and the Dean, Faculty of Social Sciences, Cochin University of Science and Technology, for his expert guidance. I consider it a great privilege to have been able to work under his supervision and guidance.

I would also like to express deep sense of gratitude to Dr. D. Rajasenan, Professor and Head of the Department of Applied Economics, Cochin University of Science and Technology, who is also my Doctoral Committee Member, for his suggestions and constructive guidance throughout my work.

My boundless gratitude, great respect and sincere obligation is due to the Thai Government for giving approval and support for my studies in India. Acknowledgement is also expressed to the Electricity Generating Authority of Thailand (EGAT), the Provincial Office of Surat Thani province, the Royal Department of Forestry, the Royal Department of Irrigation, the Department of Mineral Resources etc. for their co-operation and wholehearted support, without which this thesis would not have been completed.
I extend my sincere thanks to the other faculty members of the department and especially to Dr. M.K. Sukumaran Nair, Dr. M. Meerabai, Dr. P. Arunachalam and Mr. Unnikrishnan for their encouragement and valuable suggestions during the various stages of my thesis work.

I am also thankful to the librarian and other staff of the Department of Applied Economics for their kind co-operation and support during my studies.

Appreciation is also extended to the personnel of the Ecological and Environmental Section of EGAT from where the related data and comments were obtained; especially to Mr. Anuchat Palakawong and Mr. Natharod Chalermpaktra. I am also thankful to Mr. Andrew Ritter and Miss. Kate Mahar for correcting thesis.

I will be failing in my duty, if I do not express my deep sense of gratitude to my parents and my family whose enormous reserve of patience and understanding sustained me in numerous ways while I was working on my thesis. I am grateful to them for their unfailing interest, optimism and support, which carried me over many difficult periods.

Last, but not the least, I would like to express my sincere gratitude to each and every one for their help and wholehearted cooperation during my studies in India and Thailand.
