Thesis Acknowledgement

Foremost, I would like to express my sincere gratitude to my academic advisors and Research Directors Prof. S. Satyanarayana and Co-Director Prof. G Verraju for the continuous support during my PhD study and research work, for their patience, motivation, enthusiasm, and immense knowledge. Other academicians Prof. YV Satyanarayana and Prof. George Victor made significant impact during my Masters education and shaped my academics. Their guidance helped me during the entire course of research and writing of this thesis. My special thanks to Prof. SDA Joga Rao for his timely advice on the concepts related Philosophy of Science and

My sincere thanks also goes to several professionals in the Applied Ethics, Information Ethics subjects who had clarified my questions and for those who published their materials and provided me an opportunity to cross reference their work within my thesis document. I would also take this opportunity to thank the administrative staff at Andhra University particularly, Mr. M. Sreenivasa Rao for providing cordial support to complete the procedural aspect of the PhD work.

On the professional grounds I am grateful to Mr Scott Laliberte, MD of Protiviti Corp USA for his patience and nurturing me in the Technology Risk Management areas and also to the key members of executive team at PHH Corporation, USA for their professional support by providing me with consulting opportunities on several Corporate Governance and Audit engagements.

I extend my gratitude to medical community at Children’s Hospital of Philadelphia (CHOP), USA, specifically Professor Emeritus Dr. Paige Kaplan, University of Pennsylvania, USA, and Dr. Ramesh Kancherla, Managing Director, Rainbow Hospitals at Hyderabad, India for allowing me to participate in close care of my children for last 13 years and also to guide me over complex bio-ethics and medical ethics implications in general. I further thank several of my colleagues within the applied ethics, technology, risk, audit, governance areas who had constantly critiqued my rational thinking and supported my research endeavors.

On the family front, I was blessed to have a supportive family and specifically my wife Neeraja had taken extra burdens on my behalf to take care of numerous familial tasks for several years while extending her full support and allowing me to focus on the career /global travels and more importantly the current research work. She had taken extra effort to provide me support so that I can focus on my academics thus helping me to eventually complete my MS in IT, MBA (Executive) and several global Professional Certifications including CISA and CISM.

Lastly I am indebted to my grandparents, my siblings and in-laws for influencing my thought process and for their extended support throughout my academic endeavors. My father Prof Vedula Subrahmanyam (retired Professor and Head of Dept of Sanskrit at Andhra University, India) had relentlessly guided me as a father, friend, advisor, mentor and as a personal coach. He would bestow his blessing in absence and from his heavenly abode.

Finally I take pride in dedicating the current PhD thesis work to my beloved parents who had sacrificed their comforts and struggled to raise each one of our family members. They had embedded us with critical thinking and core ethical values and helped us to grow as model citizens and good human beings. Particularly my parents had offered me every opportunity to grow and succeed in my life.

Thank You all,

Madhava Sarma Vedula
Research Scholar – Applied Ethics
Andhra University, Visakha Patnam, AP, India
