LIST OF TABLES

Table 1  Frequency Distribution of Patients According to Age in each Group

Table 2  Frequency Distribution of Patients According to Gender in each Group

Table 3  Frequency Distribution of Patients According to Education in each Group

Table 4  Frequency Distribution of Patients According to Socio-Economic in each Group

Table 5  Frequency Distribution of Patients According to Diagnosis in each Group

Table 6  Music Therapy Intervention in Experiment Group 1

Table 7  Music Therapy Intervention in Experimental Group 2

Table 8  Description of Variables Included in the Study

Table 9  Reliability Coefficients Obtained for Different Sub-Scales Included in SANS and SAPNS

Table 10  Inter Rater Reliability Obtained for Different Subjects Included in SANS and SAPNS

Table 11  t-ratios Obtained from Different Comparison of Means after ANCOVA Performed on Total Sample and Sub-Samples Based on Variables of Type, Gender, Education and Socio-Economic Background

Table 12  Summary of ANOVA and ANCOVA for the Comparison Between the Experimental and Control Groups on Compos-
ite Scores on Negative and Positive Symptoms for the Total Sample

**Table 12a** The Unadjusted and Adjusted Means of Scores of Experimental and Control Groups on the Composite Scores on Negative and Positive Symptoms for the Total Sample

**Table 13** Summary of ANOVA and ANCOVA for the Comparison Between the Experimental and Control Groups on Nine Subscales of Negative and Positive Symptoms for the Total Sample

**Table 13a** The Unadjusted and Adjusted Means of Scores of Experimental and Control Groups on Nine Subscales of Negative and Positive Symptoms for the Total Sample

**Table 14** Summary of ANOVA and ANCOVA for the Comparison Between the Experimental and Control Groups on Composite Scores on Negative and Positive Symptoms for the Residual Type

**Table 14a** The Unadjusted and Adjusted Means of Scores of Experimental and Control Groups on the Composite Scores on Negative and Positive Symptoms for the Residual Type

**Table 15** Summary of ANOVA and ANCOVA for the Comparison Between the Experimental and Control Groups on Nine Subscales of Negative and Positive Symptoms for the Residual Type

**Table 15a** The Unadjusted and Adjusted Means of Scores of Experimental and Control Groups on Nine Subscales of Negative and Positive Symptoms for the Residual Type
Table 16  Summary of ANOVA and ANCOVA for the Comparison Between the Experimental and Control Groups on Composite Scores on Negative and Positive Symptoms for the Male Sample

Table 16a  The Unadjusted and Adjusted Means of Scores of Experimental and Control Groups on the Composite Scores on Negative and Positive Symptoms for the Male Sample

Table 17  Summary of ANOVA and ANCOVA for the Comparison Between the Experimental and Control Groups on Nine Subscales of Negative and Positive Symptoms for the Male Sample

Table 17a  The Unadjusted and Adjusted Means of Scores of Experimental and Control Groups on Nine Subscales of Negative and Positive Symptoms for the Male Sample

Table 18  Summary of ANOVA and ANCOVA for the Comparison Between the Experimental and Control Groups on Composite Scores on Negative and Positive Symptoms for the Female Sample

Table 18a  The Unadjusted and Adjusted Means of Scores of Experimental and Control Groups on the Composite Scores on Negative and Positive Symptoms for Female Sample

Table 19  Summary of ANOVA and ANCOVA for the Comparison Between the Experimental and Control Groups on Nine Subscales of Negative and Positive Symptoms for the Female Sample
Table 19a  The Unadjusted and Adjusted Means of Scores of Experimental and Control Groups on Nine Subscales of Negative and Positive Symptoms for the Female Sample

Table 20  Summary of ANOVA and ANCOVA for the Comparison Between the Experimental and Control Groups on Composite Scores on Negative and Positive Symptoms for the Primary Education Sample

Table 20a  The Unadjusted and Adjusted Means of Scores of Experimental and Control Groups on the Composite Scores on Negative and Positive Symptoms for the Primary Education Sample

Table 21  Summary of ANOVA and ANCOVA for the Comparison Between the Experimental and Control Groups on Nine Subscales of Negative and Positive Symptoms for the Primary Education Sample

Table 21a  The Unadjusted and Adjusted Means of Scores of Experimental and Control Groups on Nine Subscales of Negative and Positive Symptoms for the Primary Education Sample

Table 22  Summary of ANOVA and ANCOVA for the Comparison Between the Experimental and Control Groups on Nine Subscales of Negative and Positive Symptoms for the High School Sample

Table 22a  The Unadjusted and Adjusted Means of Scores of Experimental and Control Groups on Nine Subscales of Negative and Positive Symptoms for the High School Sample

Table 23  Summary of ANOVA and ANCOVA for the Comparison Between the Experimental and Control Groups on Nine
## Subscales of Negative and Positive Symptoms for the Lower Class Sample

**Table 23a** The Unadjusted and Adjusted Means of Scores of Experimental and Control Groups on Nine Subscales of Negative and Positive Symptoms for the Lower Class Sample
