Fig. 4. District-wise decadal growth rate of Assam, 2011 census 11
Fig. 5. Map of Assam showing the field district 16
Fig. 6. Map of Goalpara District showing field area 17
Fig. 7. Population of Assam 45
Fig. 8. Contraceptive prevalence rate in Assam among currently married women, 15-49 year 46
Fig. 9. Total fertility rate of India and Assam 47
Fig. 10. Trends in use of contraceptive method among currently married women, 15-49 year 48
Fig. 11. Family planning performance-Male sterilization in Assam 48
Fig. 12. Family planning performance-Female sterilization in Assam 49
Fig. 13. Family planning performance-IUD insertion 49
Fig. 14. Graphical representation of the age of the respondents 104
Fig. 15. Graphical representation of the mean age of the respondents. 105

Fig. 16. Graphical representation of the educational level of the respondents. 107

Fig. 17. Graphical representation of the educational level of the respondents’ husband. 109

Fig. 18. Graphical representation of the occupation of the respondents. 111

Fig. 19. Graphical representation of the occupation of the respondents’ husband. 113

Fig. 20. Graphical representation of the monthly income of the respondents. 115

Fig. 21. Graphical representation of the monthly income of the respondents’ husband. 117

Fig. 22. Graphical representation of the age at marriage of the respondents. 119

Fig. 23. Graphical representation of the age at marriage of the respondents’ husband. 121

Fig. 24. Graphical representation of the mean age at marriage of the respondents and their husbands. 122

Fig. 25. Graphical representation of the duration of married life of the respondents. 124

Fig. 26. Graphical representation of the respondents according to the number of living children. 126
Fig. 27. Graphical representation of the total number of deceased and children ever born (CEB) to the respondents

Fig. 28. Graphical representation of the mean number of children ever born (CEB) and number of living children to the respondents

Fig. 29. Graphical representation of the sex compositions of living children of the respondents

Fig. 30. Graphical representation of the sex compositions of the family members of the respondents

Fig. 31. Graphical representation of the respondents by their desire for more children

Fig. 32. Graphical representation of the respondents by their desire for more children according to the sex preference

Fig. 33. Graphical representation of the number of children wants by the respondents on the basis of sex.

Fig. 34. Graphical representation of the respondents according to the causes of rejection for more children

Fig. 35. Graphical representation of the respondents by their opinion about ideal number of children

Fig. 36. Graphical representation of the respondents according to the gap between marriage and first birth

Fig. 37. Graphical representation of the respondents by gaps between successive birth

Fig. 38. Graphical representation of the respondents by knowledge of family planning
Fig. 39. Graphical representation of the respondents’ knowledge about specific family methods

Fig. 40. Graphical representation of the attitudes of the respondents towards family planning

Fig. 41. Graphical representation of the attitudes of the respondents’ husband towards family planning

Fig. 42. Graphical representation of the respondents according to the mutual discussions with husbands about family planning

Fig. 43. Graphical representation of the respondents by ever practice of family planning measures

Fig. 44. Graphical representation of the respondents by their choice of family planning methods

Fig. 45. Graphical representation of the respondents by ever practice of family planning measures according to the specific methods

Fig. 46. Graphical representation of the respondent’s by current practice of family planning

Fig. 47. Graphical representation of the modern family planning methods currently practice by the respondents and their husbands

Fig. 48. Graphical representation of the causes of adoption of family planning measure by the respondents

Fig. 49. Graphical representation of the causes for non-adoption of family planning measure by the respondents
Fig. 50. Graphical representation of the respondents according to their contact with family planning centre

Fig. 51. Graphical representation of the respondents according to their medical check-up during pregnancy

Fig. 52. Graphical representation of the respondents according to the sources of family planning knowledge

Fig. 53. Graphical representation of the personnel who influenced respondents in adoption of family planning measures
