Acknowledgements

The idea for the subject of this thesis germinated out of my immense interest in the Internet technology and how it challenges the existing laws to keep pace with the crime and criminals. This idea was fertilised by my legal education in different universities and institutes, which taught me the finer aspects of legal jurisprudence in this technical field.

My first expression of gratitude is, undoubtedly, reserved for (Prof.) Dr. M.S. Bains whose supervision, advice, and guidance from the very early stage of this research, as well as sharing extraordinary experiences throughout the work, provided me the necessary impetus required from time to time. He encouraged and supported me throughout my thesis with his patience and knowledge whilst allowing me the room to work in my own way.

This research work would not have seen the light of the day had it not been for the cooperation and guidance of the Chairperson, Department of Laws, Panjab University, Chandigarh and all the faculty members who have lent special ear to me every time I needed their help, advice, and guidance.

No amount of praise is high enough for the library staff at the Department of Laws, Panjab University, Chandigarh, who have lent their unflinching support in providing the research material required for the thesis.

It is a pleasure to express my gratitude to the staff at the Department of Laws, Panjab University, Chandigarh, who promptly addressed all my administrative concerns and doubts.

Without naming anyone in particular, I thank everyone who helped me in the successful realisation of this thesis.

Last, but not the least, I am indebted to my parents and family for their continuous support throughout the duration of research.
