Acknowledgement

It was a great learning experience in the Department of P.G Studies and Research in Applied Geology, Kuvempu University, Shankaraghatta, where this research work was carried out. It was pleasure interacting with each and everyone whom I met during the course of this work. I shared a lot of knowledge, information and joyful moments with every one of them. I am extremely grateful for all of them for making this research a success.

First and foremost person whom I wish to thank is my research guide Prof. Syed Ashfaq Ahmed, without whom this work wouldn’t be a reality today. His constant guidance, suggestions, motivation support and encouragement in every phase of the research was the guiding spirit behind this research.

I take this opportunity to convey my heartfelt gratitude to Dr.K.N.Chandrashekarappa Chairman, Department of P.G Studies and Research in Applied Geology, Kuvempu University, for this continues support, throughout my association with Kuvempu University.

I am extremely grateful to Prof.K.S.Anantha Murthy, for the confidence and love he has bestowed on me right from the days of post graduation studies in the department. He has always received me with smiling face and provided me useful ideas during my visits to the department.

During my visits to the department during the course this research work, Prof.G.Chandrakantha and Dr.Govindaraju have given me their valuable suggestions and encouragement. I humbly thank them for all the support they have rendered.

Prashanth Shankar Narayan, Senior Software Engineer, EMC Corporation, Bangalore, despite his busy schedule at office, made time and helped a great deal in developing the inundation algorithm and program. I gratefully acknowledge the support extended by him and his wife Sowmya G. in this research.
My research colleagues, Ibrahim Bathis, K. A, Kiran Raj S., Nischitha V., and Surabhi Bhatt have helped me in crucial stages of my research which helped in taking this work forward. I convey my heartfelt acknowledgements to them for their support.

Murulidhar D.G., Project Scientist, KSR SAC, Mysore, Ayyappa, Project Scientist, RRSSC, Bangalore, Deepak K.B., Business Development, Magnasoft Technologies, Bangalore, Raghava Sharma K., Bureau Chief, Vijayavani Daily, New Delhi have provided me with timely and much needed help during this research work. I express my sincere gratitude to all of them.

I was fortunate enough to receive unconditional support from my parents, my sister and family, my in laws, Prof. Keshava T.N and family, my friends, relatives and colleagues at personal level. I thank all of them in this occasion.

She is my greatest strength, to say the least. My wife Sowrabha Karinje, stood by me in every phase of my life. In the most difficult stages of life, when I felt stranded and lonely in the world, she was there for me. Though she was a software engineer in a reputed MNC today she stays at home, to support family. Her sacrifices are unmatched and her helps both personally and technically during the course of this research is unparallel. I express my heartfelt love, affection and gratitude to her.

Finally, express my gratitude to each and everyone who directly or indirectly played their role in the successful completion of this research work.

Ajaya S. Bharadwaja
