OBJECTIVES
Chapter - I

- To document the distribution of orchids in different vegetations in Chikmagalure district

- To calculate Frequency, Density, Abundance, Species Important Value and other statistical analysis for each recorded orchids

- To correlate Host-Orchid interaction in the study area

Chapter - II

- To document complete phenological characteristics of some selected orchid species

Chapter - III

- To study the Seed Morphometry of selected orchids

Chapter - IV

- To study the Ex-situ performance of collected orchids

Chapter - V

- To construct artificial keys on the basis of phenology, seed morphometry and floral characters of orchids for easy identification
