CHAPTER I. INTRODUCTION

Development of Creativity Studies.
Significance of Creativity.
Woman and Society
Woman in the Work Force
Creativity and women
Objectives of the Study
Definitions

CHAPTER II. A. REVIEW OF LITERATURE

Creative thinking
Conditions of Creativity
Types of Creativity
Historical Perspective
Development of Creativity
Various views of Creativity
Theories of Creativity
Measurement of Creativity

B. RELATED STUDIES - A REVIEW

Studies done abroad
Studies done in India
CHAPTER III. THE PRESENT WORK

PART I

Objectives operational definition, rationales for selection of variables and hypothesis.

PART II

Description of WATC
Administration
Selection of items
Reliability, validity
Semantic differential construction
Reliability, validity and administration
Minnesota Test of Creativity
Level of Aspiration Test
Taylor's Scale of Manifest Anxiety
The Pilot Study

PART III

The Main Study

CHAPTER IV. RESULTS AND DISCUSSIONS

CHAPTER V. CONCLUSION

BIBLIOGRAPHY
APPENDIXES

Appendix

I. Sample according to mother tongue

II. Table showing educational status of women

III. Mean scores of anxiety as per Taylor's classification

IV. Scale Socio-Economic Status

V. Classification for Taylor's Scale of Manifest Anxiety

VI. Test Booklet:

1. WATL

2. Semantic Differential

3. Minnesota Test of Creativity

4. Ladder Test

5. Taylor's Manifest Anxiety Trait Scale
List of Tables

1. Table showing the areas of activity and no. of items in each area.
2. Table showing area of activity and items of women's activity test of Creativity (WATC).
3. Item selector for WATC with their difficulty Index.
4. Table showing reliability co-efficient of WATC, various methods of teaching.
5. Table showing inter-correlation of ten areas of activity.
6. Table showing bipolar adjectives selected and areas to which they belong.
7. Table showing non-verbal tasks selected.
8. Table showing items selected from Minnesota tests for verbal tests of Creative Thinking.
9. Table showing 'r' value of various tests used to determine reliability of Taylor's manifest anxiety test.
10. Table showing distribution of subjects under various styles of life.
11. Table showing distribution of subjects occupation wise.
12. Table of mean of creativity scores in 10 different areas as measured by WATC among different age groups.
13. Table of mean of creativity scores in the different areas among married and unmarried women.
14. Table of mean of creativity scores in different areas among women of nuclear and joint families.
15. Table showing mean and S.D. of creativity scores in 10 areas of creativity as among working women, students and Housewives.
1. Table showing of mean, S.D., S.E., etc. for the creativity scores of the 3 age groups 20-30, 30-40 and 40-50.

17. Anova table of creativity scores of women of the age group 20-30, 30-40 and 40-50 years.

19. Anova table of creativity scores of various age groups among working women and housewives.

20. Table of mean, S.D., S.E., etc. of creativity scores of married and unmarried women.

21. Anova table of total creativity scores of married and unmarried women.

22. Anova table of creativity scores of high, average and low creative groups.

23. Table of mean, S.D., S.E., etc. of creativity scores of women from joint and nuclear families.

24. Anova table for creativity scores of women from joint and nuclear families.

25. Anova table of creativity scores of students, housewives and working women from nuclear and joint families.

26. Table of mean, S.D., S.E., etc. of creativity scores of women from different life styles.

27. Anova table for creativity scores of women from different life styles.

28. Table of mean, S.D., S.E., etc. of creativity scores among upper, upper-middle, lower-middle, and upper-lower groups.

29. Anova table of creativity among the upper, upper-middle, lower middle and upper-lower groups.

30. Table showing partial correlation among the socio-economic factors.
31. Table showing correlation between self-concept and creativity.

32. The Mean, S.E., S.E., of ideal self-real, self and self-concept scores.

33. Table of Mean, S.D., of the ideal self and real-self scores of working women, students and housewives.

34. ANOVA table of ideal self score of high, average and low creatives.

35. ANOVA table of real self scores of high, average and low creatives.

36. ANOVA table of self-concept scores of high, average and low creative group.

37. Table showing co-efficient of correlation between aspiration scores and creativity.

38. Table of Mean, S.E., S.E., of level of aspiration among the high, average and low creative women.

39. Table of Mean, S.D. scores of high, average and low creative groups.

40. ANOVA table of API I scores of high, average and low creatives.

41. ANOVA table of API II scores of high, average and low creatives.

42. ANOVA table of API III scores of high, average and low creative women.

43. Table of co-efficient of correlation between anxiety and creativity scores.

44. Table of Mean, S.D., S.E., max of anxiety scores of high, average and low creatives.

45. Table of Mean, S.D., S.E., std. dev. of mean anxiety scores of students, working women and housewives.
46. Table of co-efficient of correlation between anxiety scores and creativity scores of housewives, working women and students.

47. Anova table of anxiety scores of high, average and low creative.

48. Anova table of creativity scores between normally anxious, significantly anxious, highly anxious and uncontrollably anxious groups of women.

49. Table showing multiple correlation between creativity and aspiration level, anxiety and self-concept.

50. Table showing level of significant relationship of creativity and other psychological factors.

51. Table of multiple regression analysis of creativity and psychological variables.
List of graphs

1. Graph showing mean creativity scores of the different age groups.

2. Graph showing frequency distribution among the three age groups of creativity scores.

3. Graph showing frequency distribution of creativity scores.

4. Pie Diagram of High, Average and Low Creatives among married and unmarried women.

5. Histogram comparing creativity scores of nuclear and joint families.

6. Graph showing level of aspiration among High, Average and Low Creatives.
