ACKNOWLEDGEMENTS

The author is greatly indebted to Prof. T.V. Desikachary, University Botany Laboratories, Madras, for his kind guidance during the present work. The present investigation was suggested by him and but for his help, it would not have been possible to complete this work. To Dr. A.C. Joshi, formerly Vice-Chancellor, Panjab University, the author is grateful for the financial assistance to visit and study some of the hot spring areas in India. Dr. R.C. Paul, Dean of University Instructions and Head of the Chemistry Department, Panjab University, Chandigarh and his students Messrs. S.K. Vasishta and Mohan Singh, were kind enough to help the author in conducting the chemical analysis of the water of some hot springs in the Kulu valley. To Miss T.F. Zakharova, visiting lecturer in Russian, Panjab University, Chandigarh and to Mr. S.K. Rihani, Chemistry Department, Panjab University, Chandigarh, the author is grateful for translating some Russian and German publications.

The author is grateful to his revered teacher, Dr. P.M. Mehra, Professor and Head of the Botany Department, Panjab University, Chandigarh, for his continued help and encouragement during the present work. To Dr. P. Bourrelly, Museum Nationale d'Histoire naturelle, Paris, the author is indebted for lending some of the publications on the Cyanophycean flora of the French Spas.

The author owes his sincerest regards to Prof. Rev. Fr. Santapau, Director, Botanical Survey of India, Calcutta, for rendering into Latin the diagnoses of the new taxa.

The author is grateful to the University Grants Commission, New Delhi, for a research grant to finance the collection trips to various thermal areas in the country.
