ACKNOWLEDGEMENTS

This thesis arose out of years of research that has been achieved with a great number of people whose contribution in assorted ways to the research and making the thesis deserved special mention. It is a pleasure to convey my gratitude to all of them in my humble acknowledgment.

It is a great pleasure for me to say deepest thanks and gratitude to my guide Dr. H. Jayadevappa, Associate Professor, Department of Chemistry, Sayadri Science College, Kuvempu University, Shimoga, Karnataka, India, for his guidance and support. I am very much grateful to have had the opportunity to work with such a respected person. I take this opportunity to thank deep sense of gratitude for the encouragement, support and suggestions throughout the course of this work.

It has been great pleasure and fortune to work with Dr. B.E. Kumara Swamy, Assistant Professor, Department of Post Graduate Studies and Research in Industrial Chemistry, Kuvempu University, Shankaraghatta-577 451, Shimoga, Karnataka, India, my research supervisors and co-guide, who encourage me to focus on research activity from M.Sc second year to till now and accepting me as part of his research group and introduced me to the field of Nanoscience, Electrochemistry and in particular Nanomaterial based Electrochemical Sensor. Right from the time I started working on my thesis, he has been very helpful in organizing my ideas and putting together a very fine piece of work without him, I would never have reached this point and he sent me training 4 to 5 months under Dr. H.N. Vasan, Principal Scientist, SSCU, IISc, Bangalore, on “nanoparticles synthesis and characterization”. I take this opportunity to thank him with deep sense of gratitude for the painstaking tutelage, encouragement, support and suggestions throughout the course of this work. Thanks a lot for making my dreams to come true!

I am highly grateful to Prof. S.A. Bari, Vice-Chancellor, Kuvempu University for giving me, an opportunity to pursue my dreams. His encouragements and constant support especially for providing the necessary facilities helped me to make this thesis a better one. Thank you sir for the opportunity given to me to do research in Kuvempu University.
It is an honour for me to my deepest thanks and gratitude to Prof. B.S. Sherigara, Professor of Industrial Chemistry (Retd), Former Vice-Chancellor of Kuvempu University, Shimoga, Karnataka, India. Who introduced electrochemistry research lab and group in the Department of Industrial Chemistry.

I thank University Grant Commission for providing me fellowship and facilities.

I would like to express my sincere thanks to Dr. H.N. Vasan, Principal Scientist, SSCU, IISc, Bangalore, India, who has shared his knowledge, experience and given me an opportunity to work in his lab. I take this opportunity to thank deep sense of gratitude for the painstaking tutelage, encouragement, support and suggestions throughout the course of this work.

I would like to show my gratitude to Prof. K. Vasantakumar Pai the BOS Chairman, Department of Post Graduate Studies and Research in Industrial Chemistry, Kuvempu University, Shankaraghatta-577 451, Shimoga, Karnataka, India, for undertaking the unenviable task of serving on my thesis committee, I am indebted for his valuable contributions and suggestions when they were sorely needed, that shaped this thesis and helped to make it better.

I grateful acknowledge the persistent support and encouragement from Prof. H.S. Bhojya Naik, Chairman, Department of Post Graduate Studies and Research in Industrial Chemistry, Kuvempu University, Shankaraghatta-577 451, Shimoga, Karnataka, India, who was my departmental mentor when I started my research work at Kuvempu University. His passion for Chemistry and an enthusiastic vision of the world helped to shape my academic interests and positively influenced other aspects of my life as a Research Scholar.

I am very thankful to the Faculty members of the Department of Industrial Chemistry and Chemistry, Kuvempu University, Shankaraghatta - 577 451, Shimoga, Karnataka, India, Dr. Y.D. Bodke, Dr. J. Manjanna, Dr. (Mrs). C.N. Sudhamani, Prof. V.P. Vaidya, Prof. T.V. Venkatesha, Prof. J. Keshavayya, Dr. Y. Arthoba Naik, Dr. G. P. Mamatha, Dr. K.M. Mahadevan and Dr. N. D. Satyanarayan with
whom I had an opportunity to interact with during my research work. Their guidance and support helped me, to mature as a researcher and influenced the work I did in this thesis. Thanks a lot for your unconditional support and a never ending patience.

I am very thankful to the Faculty members, Colleague and Research Scholar of the Department of Chemistry, Sahyadri Science College, Shimoga, Karnataka, India, with whom I had an opportunity to interact with during my research work. Their guidance and support helped me, to mature as a researcher and influenced the work I did in this thesis.

I would like to express my sincere thanks to all my lab mates past and present in particular Dr. E. Niranjan, Dr. M. Pandurangachar, Dr. Ongera Gilbert, Mr. Umesh Chandra, Dr. J. G. Manjunatha, Mrs. S. Chitravathi, Mr. M.T. Shreenivas, Mrs. Rekha, Mr. V.K. William Grips, Mr. B.N. Chandrasekhar, Mr. S. Sharath Shankar, Mr. K. R. Vishnu Mahesh, Mr. K.R. Mahathesha, Mr. T.V. Sathish, Mr. K. Gangadhar Reddy, Mr. P. Raghu, Mr. T.E. Musturappa, Dr. G. Vinod, Mr. Mohan Kumara, Mr. Somanath Ghosh, Mrs. Sultan, Mr. Venkatesh, Mr. C.C Vishwanatha, Mr. R.S. Ashok, Mr. K.J. Guru Raj, Mr. A. Sathisha, Mr. K.V. Harisha, Mr. P.S. Ganesh and Mr. S.R. Kiran Kumar for the input they provided during numerous formal and informal discussions we had. Their continuous interest in my research, their jokes and occasional criticism provided a fresh perspective on my work, helped me to keep a positive outlook, and reinstated my confidence when it was needed. Thanks a lot for your countless help and support during my stay in Kuvempu University.

A special thanks also goes out to Mrs. Deepa Kumara Swamy and Pratham Swamy for their constant encouragement and support throughout my research work.

I wish to thank Dr. Michal Rajmathi, Department of Chemistry, St. Joseph College, Bangalore, India for performing the IR and XRD studies.

I wish to thank Dr. G.S. Avadhani, Principal scientist, the Department of Materials Engineering, Indian institute of Science, Bangalore, India for performing the TEM studies.

viii
I wish to thank Mr. Gurulinga, of the Department of Materials Engineering, Indian institute of Science, Bangalore, India for performing the SEM studies.

I would like to thank my beloved parents Mr. Narayana Reddy and Mrs. G. Nagaratamma, for teaching me the value of education, supporting and believing in me for the entire period of my studies. I sincerely appreciate their efforts and sacrifices that they made so that I could have the education. They, along with my beloved brother Mr. G.N. Rajashekara, have been there for me when I was stressed, worn out, and needing encouragement. Their love, patience, and encouragement they showed through my entire life and throughout the period of my study at Kuvempu University, in particular. Their blessings, guidance and love have brought me a long way in my life.

I would especially like to thanks my entire family member for their support and encouragement. They always believed in me and stood by me.

I would like to thank the non-teaching staffs of the Department of Industrial Chemistry, for their support and encouragement throughout my research work. I am also very grateful to Kuvempu University library for providing me with the library facilities during the course of my research work.

I thank SGS Computers, for aligning and Web World for printing this thesis.

Lastly, I offer my regards and blessings to all of those who supported me in any respect during the completion of my thesis.

Sathish Reddy....
