# CONTENTS

1. INTRODUCTION 01 - 16
   1.1 Plant as a drug
   1.2 Osteoarthritis and its Drug Target
   1.3 *In silico* Drug Designing
2. REVIEW OF LITERATURE 17 - 35
   2.1 *Kriganella reticulata*
   2.2 Arthritis
3. MATERIALS AND METHODS 36 - 68
   3.1 Pharmacognostic Evaluation
   3.2 Phytochemistry of plant
   3.3 Pharmacological Screening
      3.3.1 *In vivo* studies
         a. Analgesic activity
         b. Anti-inflammatory activity
         c. Anti-arthritic activity
      3.3.2 *In vitro* studies
         a. Antimicrobial activity
         b. Antioxidant activity
         c. Anti-helminthic activity
         d. Anti-arthritic activity
   3.4 Pathway studies of arthritis
      3.4.1 Identification of drug targets
   3.5 Binding studies of drugs and targets
4. RESULTS 69 - 130
5. DISCUSSION 131 - 154
6. SUMMARY 155 - 159
7. CONCLUSION 160 - 161
   BIBLIOGRAPHY 162 - 191
