ACKNOWLEDGEMENTS

First of all I thank God almighty for giving me wisdom to successfully complete my Ph.D. This work would have not been accomplished without sincere support, and patience of following people. I express my humble gratitude towards all of them for their support and patience.

First and foremost, with deep sense of gratitude, I express my sincere thanks to my supervisor and guide Dr. Arijit Mukhopadhyay for his constant guidance throughout my Ph.D. work. He gave me freedom to do work on my own and guided towards the right path whenever I diverted from the goal.

I acknowledge CSIR (Council of Scientific and Industrial Research) for giving me funding for doing research. I would also express my sincere gratitude towards CSIR-Institute of Genomics and Integrative Biology (CSIR-IGIB), Delhi for providing a great place to work. I am thankful to Dr. Rajesh S. Gokhale (Director CSIR-IGIB), Dr. K. C. Gupta (Former Director CSIR-IGIB), and Prof. Samir K. Brahmachari (Former Director CSIR-IGIB, and former DG, CSIR) to providing an opportunity to work in esteemed research institute CSIR-IGIB. I am thankful to CSIR-IGIB PME division staff Dr. Girija Nair, Mr. Bharat Ratan Gupta, Mr. Vishal Goyal, Mr. Nikhil Shankar, Mr. Virendra, and others for their support towards completion of this thesis. I would like to acknowledge University of Pune, Pune for my Ph.D. registration. I am very thankful to Mr. Bharat Ratan Gupta. He is really a kind person and helps students a lot.

I express my sincere gratitude towards Dr. Kunal Ray, for his thoughtful discussion in every aspect of my thesis work. He has been very supportive and has a kind gesture for students. I have learnt so many things from him. Talking to him is a great pleasure. I also thank Dr. Debasis Dash, Dr. Mitali Mukerji and Dr. Anurag Agrawal for their valuable comments and support in my Ph.D. work. I am really grateful to Dr. Debasis Dash for his valuable comments on my work. Sir without your help it would not be possible for me to analyze such a huge amount of data.
My sincere thanks go to our clinician Dr. Abhijit Sen and collaborator Professor Jharna Ray. Without them it was not possible for us to design this study.

I am extremely thankful to Dr. Pankaj Jha, Dhirendra and Charu. They all helped me in analyzing the data. Dr. Pankaj Jha was the first person in IGIB who taught me about CNV. I learned high throughput experiments related to SNP genotyping from him. Initial days of my PhD. I was feeling difficulty to analyze high throughput data. Dhirendra and Charu helped me to computationally analyze the data.

I would like to acknowledge my all lab mates who helped in my work and supported me in the journey of my Ph.D. I would like to thank Samreen, Ramawatar Nagar, Subhashree, Anchal, Mansi, Saurabh, Deepanjan, Bharati, Kiran, Asish, Jyoti, Joydeep, Kunal, Prajakta, Asgar and Smitha. My special thanks go to Samreen for her valuable advice and support in my work. Her views and dedication towards research made me inspire to do more and better in my PhD work and in future. She is really a true friend of mine. I express my special thanks to Ramawatar Nagar for his valuable help during my Ph.D. He is like my brother. He always supported me when I really needed him. Jyoti helped me during initial days of my PhD life. Our initial data on SNP genotyping was not possible with her help. I am thankful for Mansi and Kiran for their fruitful discussion related to my and their work. Scientific discussion with Deepanjan helped me a lot during my PhD.

I would like to acknowledge our journal club and lab meetings. Because of our journal club and lab meetings I was able to learn about so many different aspects and fields of biological science. My knowledge and my thoughts became clearer. Specially, during lab meeting I gained more confidence to ask questions. I feel lucky that our lab meetings made me a better researcher.

I would also like to thank Dr. Mohammed Faruq and Dr. Rajesh Pandey for their kind support in my work and for showing their trust on me and my abilities.

I would like to thank Rashi and Parasar for their helpful discussion for my thesis work.

I would like to thank my friends in our journal club. I am thankful to Varun, Amit Chaurasia, Priyanka Jain, Pramod, Anupam, Rishi, Dr. Amit yadav, Dr. Prashant Singh, Suman, Nidhi, Ankita, Amit mandal, Rintu, Samarth, Vivek and Dr. Inder.
I am thankful for Dhurjyoti for helping me in ChIP-Seq experiments.

I am very thankful to IT support team of CSIR-IGIB. I would like to thank M. V. Raghunandanan and Vikash Pandey for giving a great IT service to CSIR-IGIB.

The assistance provided by Neelam Madam and SP singh Sir is greatly acknowledged.

I would also acknowledge my batch mates and friends Bhanwar lal punia, Ajay Jajodia, Aina and Samantha Kohli for making my Ph.D. enjoyable.

I am thankful to Harish, Amit and Deepak.

I am extremely thankful to all my graduation teachers for building a strong foundation which enabled me to carry out the present research. I am thankful to Dr. Uma Pillai, Dr. Ani Courian and Dr. Puneet Saraswat. They provided me necessary guidance and resources during my graduation. Without their guidance It was not possible me to reach this stage. I feel lucky that I got them as my teachers.

I am thankful to Gaurav Malik for making my PhD enjoyable. He was the one who inspired me to go to gym for making good health. He is really a true friend of mine.

I would express my sincere thanks to all my friends who supported me outside the CSIR-IGIB. Seema, Toshi Anna, Elisa Raju, Ashok gahlot, Kuldeep (Mindeshwar), Babloo, Gajendra (Gajju), Nitin (Neetu R….), Priyanka, Priya, Khushi, Pooja, Saira, Prachi, Khan Bhai, Naveen sir, Ravi sir, Jogi sir, Rauny, Ganga bhai and Santosh Bhai all were great companions in my Ph.D. journey.

I would like to acknowledge all the patients who participated in this study.

This work would not have been completed without the love and patience of my family. I am thankful to my Parents, brother Yogesh and sister Heena for having faith in me.

(Lalit Kaurani)
