ACKNOWLEDGEMENT

Applying one to pursue a Ph.D. project is as challenging as rewarding. Throughout this process I have gained not only a greater insight into my topic but more importantly a greater understanding of how the efforts of many people and factors have come together to develop and present this work. I would like to convey my thanks and appreciation to those who have helped me reach the end of this chapter of work.

I would like to thank my Supervisors, Dr. Ganeswar Nath and Professor (Dr) Sarat Kumar Swain for their guidance and valuable suggestions, without which I would have been unable to complete this body of research. I would further like to convey my thanks to them for their supportive and kind nature as they continuously provided valuable advice and direction at times when it was most required. I am extremely appreciative of their constant support for facilitating my learning through their rich academic and practical experiences. Their companionship and deep knowledge supported me greatly in this study.

I am thankful for timely advice given to me by Prof. Rita Paikaray, Department of Physics, Ravenshaw University, Cuttack, India. Discussions with her, helped me a better understanding in specific areas of my research. I am very thankful for the technical and administrative support I received from the Head of the Department and faculty members of Department of Physics of VSSUT. I also express the team of members of central library of VSSUT for their help in accumulating my references. A token of appreciation is placed here to the Dean and staff of academic section of VSSUT for various administrative supports as and when required.

Special mention also goes to Miss. Ranjita and Kalyani research scholar, Department of Physics and Chemistry, VSSUT, Burla for their immense help through the many stages of my
study, especially when it came to experimentation and calculation. My expression of thanks may be in complete if I shall forget to appreciate the strong cooperation and help received from all research scholars of Department of Physics and Chemistry. I greatly appreciate the academic and technical support provided to me by the Head of the Department and Faculty members of Department of Physics, Christ College, Cuttack, India which made this research possible.

Whilst, I express my acknowledgement to professionals involved in helping me complete my dissertation. I would like to express my sincere regards to my parents Dr. Nrusingha Charan Sarangi and Smt. Snigdharani Sarangi for their constant encourage and blessing. The continuous support and all time cooperation of my wife Sabita, younger brother Abhisek and my little daughter Abhinandita with connection to their unconditional & endless patience, for comforting and encouraging me during the challenging periods of this phase of my life are highly acknowledged. Without their support, I would not be able to complete the present work and inspiration for the future study.

At last not least I dedicate the whole piece of work in the feet of Lord Jagganath and Lord Ganesha for blessing. I also express my thanks to those whom I have failed to mention but have played a contributing part of this endeavor.

Date: 22.09.2015  Abhijit Sarangi
