Acknowledgement

Early in the process of completing this project, it became quite clear to me that a researcher cannot complete a Ph.D. thesis alone. Although the list of individuals I wish to thank extends beyond the limits of this format, I would like to thank the following persons for their dedication, prayers, and support:

After thanking Almighty God – the first person I wish to convey my sincerest thanks, is my Honorable Supervisor, Prof. Sunil Kumar Sharma, under whose able guidance this study was successfully completed. His ability to probe beneath the text is a true gift, and his insights have strengthened this study significantly. I will always be thankful for his wisdom, knowledge, and deep concern. I am indebted to him for giving me the opportunity to carry out my research work in his esteemed group and providing with all necessary facilities in the laboratory, with loads of helpful suggestions, important advices and constant encouragement during the course of this work.
