</table>
3.1c Frequency distribution of children in comparison with normal and above normal RDW values (Phase 1 and 3).

3.1d Frequency distribution of children in comparison with severe, mild, moderate and normal Hemoglobin values (Phase 1 and 3).

3.1e Frequency distribution of children in comparison with normal and below normal MCV values (Phase 1 and 3).

3.1f Frequency distribution of children age wise in comparison with normal and below normal HCT values (Phase 1 and 3).

3.1g Frequency distribution of children in comparison with normal and below normal MCH values (Phase 1 and 3).

3.1h Frequency distribution of children in comparison with normal below and above normal Platelet values (Phase 1 and 3).

3.1i Frequency distribution of children in comparison with normal, above and below normal WBC values (Phase 1 and 3).

3.2 Hematological Parameters. Mean and Standard Deviation Values in Phase 1 and 3.
3.3 Mean Change in the Hematological Parameter Pre (Before) to Post (After) the Nutrition Intervention Program, from Phase 1 to 3.

3.4 Indices suggestive of the presence of iron deficiencies.

3.4 a Frequency distribution of children in comparison with normal, below normal serum iron value (Phase 1 and 3).

3.4 b Frequency distribution of children in comparison with normal and above normal TIBC values (Phase 1 and 3).

3.4 c Frequency distribution of children in comparison with severe, mild and moderate % iron saturation values (Phase 1 and 3).

3.5 Biochemical parameters Mean and Standard Deviation values in Phase 1 and 3.

3.6 Mean change in the biochemical parameter from Phase 1 to 3.

3.7 a Frequency distribution of children in comparison with normal MCHC standards Phase 1 and 3. (Udayachal (Godrej) Primary school).

3.7 b Frequency distribution of children age in comparison with normal and below normal RBC values (Phase 1 and 3). (Udayachal (Godrej) Primary school).
3.7c Frequency distribution of children in comparison with normal RDW values (Phase 1 and 3). (Udayachal (Godrej) Primary school).

3.7d Frequency distribution of children in comparison with mild, moderate and normal Hemoglobin values (Phase 1 and 3). (Udayachal (Godrej) Primary school).

3.7e Frequency distribution of children in comparison with normal and below normal MCH values (Phase 1 and 3). (Udayachal (Godrej) Primary school).

3.7f Frequency distribution of children in comparison with normal and below normal MCV values (Phase 1 and 3). (Udayachal (Godrej) Primary school).

3.7g Frequency distribution of children in comparison with normal and below normal HCT values (Phase 1 and 3). (Udayachal (Godrej) Primary school).

3.7h Frequency distribution of children in comparison with normal, above and below normal Platelets values (Phase 1 and 3). (Udayachal (Godrej) Primary school).

3.7i Frequency distribution of children in comparison with normal, above and below normal WBC values (Phase 1 and 3). (Udayachal (Godrej) Primary school).

3.8a Frequency distribution of children in comparison with normal and below normal Serum iron values
Frequency distribution of children age wise in comparison with normal and above normal TIBC values (Phase 1 and 3). (Udayachal (Godrej) Primary school).

Frequency distribution of children in comparison with severe, mild, moderate and normal % Iron Saturation values (Phase 1 and 3). (Udayachal (Godrej) Primary school).

Correlations between Hematology and Biochemical Parameter (N=330)

BMI - Frequency distribution of children, according to NCHS BMI for age Percentile classification Phase 1 and 3.

Frequency distribution of children according to Khadilkar’s Percentile Classification of BMI for age according to N=225 (5-18 years).

Frequency distribution of children according to NCHS Height for age Percentile classification Phase 1 and 3.

Frequency distribution of children according to Khadilkar’s Percentile Classification of Height for Age (5-18 years) N=225.

Frequency distribution of children age wise according
to NCHS Weight for age Percentile classification Phase 1 and 3.

3.11b Frequency distribution of children age wise according to Khadilkar’s Percentile Classification of Weight for Age according to N=225 (5-18 years).

3.12 Mean change age wise in weight, height and BMI from Phase 1 to 3. (N = 257)

3.12a1 Correlation between Hematology and Anthropometric Parameters of the main research study.

3.12a2 Correlation of Biochemical with Anthropometric Parameters Phase 1 and 3.

3.13 A Clinical Signs of anemia - Frequency Distribution of children.

3.13 B Clinical Signs of anemia - Frequency Distribution of children.

3.13 C Clinical Signs of anemia - Frequency Distribution of children.

3.13 a Food Preferences – Green Leafy Vegetables.

3.13b Food Preferences – Green Leafy Vegetables.

3.13 c Food Preferences – Vegetables.

3.13d Food Preferences – Fruits.

3.13 e Food Preferences – Fruits.

3.13 f Number of children consuming Fruit and
Vegetable Intake. Total Number =330

3.13g  Food Preferences – Milk & Milk Products  178

3.13h  Food Preferences - Dry Fruits and Oil Seed.  181

3.13i  Food Preferences – Products made of Maida  183
(Refined Flour).

3.13i1  Food Preferences – Products made of Maida  184
(Refined Flour).

3.13 j (i)  Food Preferences – Non Vegetarian.  186

3.13 j (ii)  Food Preferences – Non Vegetarian.  187

3.13k  Food Preferences – Cereals.  191

3.13k1  Food Preferences – Cereals.  192

3.13 l  Food Preferences – Pulses.  193

3.13 la  Food Preferences – Pulses.  194

3.13 m  Food Preferences – Soya bean and its products.  195

3.14 a  Dietary Intake -age wise - a comparison –  199

Mean Energy (kcals) Dietary Recall 1, 2 and 3.

3.14a1  Correlation between Hematology and Dietary  200
Parameters-Total Calories.

3.14a2  Correlation between Biochemical and Dietary  201
Parameters-Total Calories.

3.14a3  Correlation of Dietary with Anthropometric  202
Parameters-Total Calories.

3.14b  Dietary Intake -age wise - a comparison –  204
Mean Carbohydrates (gm) Dietary Recall 1,
2 and 3. *(RDA Carbohydrate Intake is calculated
at 60% of total RDA kcals)

3.14b1 Correlation between Hematology and Dietary 205
Parameters – Carbohydrates.

3.14b2 Correlation between Biochemical and Dietary 206
Parameters – Carbohydrates.

3.14b3 Correlation of Dietary Carbohydrate with 207
Anthropometric Parameters.

3.14c Dietary Intake - age wise - a comparison – Mean 210
Protein (gm) Dietary Recall 1, 2 and 3

3.14c1 Correlation between Hematology and Dietary 211
Parameters – Protein.

3.14c2 Correlation of Dietary Protein intake with 212
Biochemical Parameters.

3.14c3 Correlation of Dietary Protein with Anthropometric 213
Parameters.

3.14d Dietary Intake - age wise - a comparison – Mean Fats 217
(gm) Dietary Recall 1, 2 and 3.

3.14d1 Correlation between Hematology and Dietary 218
Parameters – Fat.

3.14d2 Correlations between Biochemical and Dietary 219
Parameters – Fat.
Correlation of Dietary Fat with Anthropometric Parameters.

Dietary Intake - age wise - a comparison – Mean Total Dietary Iron (mg) Dietary Recall 1, 2 and 3.

Dietary Intake - age wise - a comparison – Mean Heme Iron (mg) Dietary Recall 1, 2 and 3.

Dietary Intake - age wise - a comparison – Mean Non heme Iron (mg) Dietary Recall 1, 2 and 3.

Correlation between Hematology and Dietary Parameters – Iron.

Correlations between Hematology and Dietary Parameters – Heme and Non Heme Iron.

Correlation of Dietary Iron, Heme and Non Heme iron intake with Biochemical Parameters.

Correlation of Dietary Iron with Anthropometric Parameters.

Dietary Intake - age wise - a comparison – Mean Calcium (gm) Dietary Recall 1, 2 and 3.

Correlation between Hematology and Dietary Parameters – Calcium.

Correlation between Biochemical and Dietary Parameters – Calcium.
3.14i3 Correlation of Dietary Calcium with Anthropometric Parameters. 239

3.15 Mean Change in Dietary Nutrients from Diet Recall 1 to Diet Recall 3. 240

3.16 Mean Marks (Academic Performance) Phase 1 and 3 246

3.16a Mean change in Marks Pre (Phase 1) to Post (Phase 3) 246

3.17 Mean attendance Phase 1 and 3 247

3.17a Mean change in Attendance, Before (July to October) the Nutrition Intervention and After (November – February) 247

3.18 Stool examination Results and Interpretation 252

3.19 Correlation of Attitude and Practices of parents before and after the Nutritional Intervention Program: 259

3.20 Summary of research on child-feeding behavior 260

AKNOWLEDGEMENT

We wish to thank the mentor of this project Dr. Ashok Bhagawat without whose support and guidance, my project would never have been complete.

My deepest thanks to (Late) Dr Aftab D Lakdawala, Dr Pai, Dr Samuel, Dr Krutika Desai their valuable guidance motivated the completion of this project.

I express my gratitude to Dr. Karmarkar, Dr. Chaya Sawant, Dr. Suvarna Bhoir and Dr. Purvi for being an excellent faculty at School of Science.

We thank Janab Shamoil Bhaisaab for giving his blessing to the project

We are grateful to Sheikh Ibrahimhbai Electricwala under whose vision and inspiration this project was undertaken.

Special thanks to (Late) Dr Aftab D. Lakdawala for organizing stool parasitological examination through Saifee Ambulance.

Ms. Devina Rawal Principal of Saifi Boys School was a pillar of great support and with whom this project has achieved success far beyond its capacity.
Ms. Sweta Joshi Saifi, school counselor, was the strength of this project. I thank her for being there and motivating parents to be a part of this project.

We also wish to thank all the parents and children who participated in this program.

I am grateful to Prof. Pangam who unfailing assistance has formed the backbone of this study.

I wish to thank all my Nutrition team members - Roopali Mehta, Bhakti Tulaskar, Sneha Tajan, Nisha Bellare, Anjali Tiwari, and Jasneet Alag.

I wish to thank all my Hematological Team members - Madhuri Khanolkar, Alpita Patel, and Devashree Prabhudesai.

I wish to thank all my Doctors Team for Health Screening and Talks - Dr. Hatim Pardawala, Dr. Saddiq Uttanwala, Dr. Ali, Dr. Gabrani, Dr. Ameen, Dr. Rohit Bartake, Dr. Rohan Bartake, Dr. Gazala, Dr. Deepak Yadav, Dr. Alifiya, Dr. Abbasali Rangwala, Dr. Hitesh Advani, Dr. Suchi Mehta.

I would like to thank Mr. Shivaji who helped me during the blood screening camp.
We would like to thank the students of SNDT matunga as well as our competition sponsors Nestle India and RRO Company

I thank my parents who wished I complete my PhD. and motivated me always.

I thank my PhD classmates and friends Rupali, Mansi and Vijay I will cherish those precious moments of fun that enabled me to overcome my stress of work.

Last but not the least My Husband, Krishna Thar who stood rock solid behind me throughout my work.
