Chapter
I Introduction ........................................... 1
II The Problem - Need, Purpose and Scope .......... 13
III Review of Literature ................................ 24

PART I
Construction and Standardisation
of Achievement Test.

IV Procedures and Techniques ....................... 42
V Statistical Treatment of Data ..................... 64
VI Interpretation of Data ............................. 90

PART II
Construction of Attitude Scale.

VII Construction of attitude scale ................ 95
VIII Statistical Treatment of Data .................. 114
IX Interpretation of Data ............................ 126
X Summary ............................................. 131

Continued—
TABLES

I Distribution of 100 items over the course content and the objectives. 47

II The frequency of difficulty values and indices of discrimination for 100 items. 54

III The frequency of difficulty values and indices of discrimination for 50 items in the final form of the test. 55

IV Distribution of 50 selected items over the course content and the objectives. 57

V Frequency Distribution of the scores made by 1380 students on the test. 65

VI Frequency Distribution of the scores made by 696 urban and 684 rural students on the test. 66

VII Frequency Distribution of the scores made by 978 boys and 402 girls on the test. 67

VIII Frequency Distribution of the scores made by 654 government school students and 726 non-government school students on the test. 68

IX Mean, Median, Standard Deviation of the test scores and Standard Error of these measures for the whole group and various sub-groups. 70

X The difference, the standard error of the difference and critical ratio for the difference between the means, between the medians and between the standard deviations of the test scores for the various sub-groups. 72

TABLES

XXI Mean, Median, Standard Deviation of the scores on the scale and the standard error of these measures for the whole group and various sub-groups. 119

XXII The difference, the standard error of the difference and critical ratio for the difference between the means, between the medians and between the standard deviations of the scale-scores for the various sub-groups. 120

XXIII The co-efficients of correlation between the scores on the test and the scores on the scale. 124

XXIV Distribution of scores made on the scale by the whole group and the various sub-groups. 125

XXV Summary of statistics for the Achievement test. 134

XXVI Summary of statistics for the Attitude scale 138

Schematic Diagrams

I Showing the various components of the selected sample for the test. 61

II Showing the various components of the sample for the scale. 110

GRAPHS

1 The difficulty values and index of discrimination for the 100 items in the preliminary form of the test. 55

2 Distribution of 1380 students taking the test. 61

Contd....
3 Frequency polygons of 1380 test scores made by the whole group.

4 Frequency polygons of the test scores made by students in Urban and Rural areas.

5 Frequency polygons of the test scores made by boys and girls.

6 Frequency polygons of the test scores made by students in Govt. and non-Govt. schools.

7 Percentile-curves of the test scores made by students in Urban and Rural areas.

8 Percentile-curves of the test scores made by boys and girls.

9 Percentile-curves of the test scores made by students in Govt. and non-Govt. schools.

10 Distribution of scale-values.

11 Distribution of 1120 subjects taking the scale.

12 Frequency polygons of 1120 attitude scale scores made by the whole group.

13 Frequency polygons of the scale-scores made by students in Urban and Rural areas.

14 Frequency polygons of the attitude scale scores made by boys and girls.

15 Frequency polygons of the attitude scale scores made by students in Govt. and non-Govt. schools.

16 Percentile curves of the scale-scores made by students in urban and rural areas.

17 Percentile curves of the scale-scores made by boys and girls.

Contd....
APPENDICES

1 Syllabus in Everyday Science for class VIII
2 Preliminary form of the Test
   (a) Hindi  (b) Punjabi
3 Answer sheet for the Preliminary form of the test.
4 Scoring stencil for the Preliminary form of the test.
5 Table 'A'. Responses made by the highest and the lowest 27% of the 370 examinees to each option of 100 items in the Preliminary form of the test.
6 Final form of the Test (Hindi)
7 Final form of the Test (Punjabi)
8 Answer-sheet for the final form of the test.
9 Scoring stencil for the final form of the test.
   a) Correct options
   b) Incorrect options
10 List of schools selected for the administration of the test and the scale.
11 Calculation of $\sum pq$ for determining the coefficient of Reliability for the test by KR Form 20.
12 Preliminary List of Statements (Hindi)
13 Preliminary List of Statements (Punjabi)

Contd.....
APPENDICES

14 Instruction to Judges for evaluating the statements.

15 Sheet for recording the serial number of statements.

16 Table 'B'. Median, Q-deviations, Q-values and accumulative proportions for the 58 statements.

17 Final form of the scale
   (a) Hindi   (b) Punjabi

18 Scoring Key for the scale.

19 Manual of Instructions

BIBLIOGRAPHY
