"First and foremost, I would like to thank my greatest teacher of all: Almighty God. I know that I am here and that I am able to write all of this for a reason. I will do my best in never forgetting what a great fortune I have had in just being here, and that it comes with a lesson and a responsibility. I hope I am doing the work you have planned me to do."

The Ph.D. course that I had been through was truly a once in a lifetime experience. I realize there are many people who deserve to be thanked for what I have been achieving and for what I have become now. Every human being has an in-built scientist in him and it is just the apt nurturing that enables us to realize the research mind and aptitude within. First of all, I would like to thank the person directly responsible for my Ph.D. thesis - my supervisor Professor Indu Pal Kaur. It has been a pleasure working with her. Her simplicity and passion towards research has been an inspiration to me. The constant moral support, constructive advice and criticism, untiring interest throughout the pursuit of the research were really helpful. Her time, possessions and knowledge not only enriched me but also helped me to face the difficulties I faced during my research work as well as personal life. I learnt a lot about research, teaching and about myself during conversations with her. Her warm affection helped me to endure my utmost difficult times in my life. One more special thing I learnt from her, is the art of praying to the Almighty. Those prayer sessions really made impact on my mind and helped to feel mental peace, which I think, is most important during this phase.

I also wish to thank the present Chairperson, Professor V.R. Sinha and the former Chairperson, Professor Karan Vasisht of University Institute of Pharmaceutical Sciences for providing excellent working environment that gave impetus to my research project. I feel privileged to have studied and worked in this distinguished Institute. I am proud of my academic roots and hope that I can in turn pass on the research values and the dreams that they have given to me. Special thanks to Professor Kanwaljit Chopra for behavioural studies conducted in her lab. I wish to thank Dr Manjit Singh from depths of my heart for his care and kind suggestions during toughest times.

Thanks to the faculty of the Institute, especially Professor Karan Vasisht, Professor V.R Sinha, Professor O.P. Katare, Professor B.S. Bhoop, Professor Renu Chadha, Dr Shishu, Dr Maninder Karan, Dr Anurag, Dr Anita, Dr Vandita and all the faculty members of U.I.P.S, Panjab University for their concern, encouragement, support and above all, the much needed and valued suggestions. A special thanks to Mr Dinesh Singla for providing gift samples of drugs for the research work. Material help from Gattefosse India and GmbH, Germany is also acknowledged.

For me, the drive towards conclusion of this thesis was not a cradle of roses. This thesis saw its completion with the support and encouragement of numerous people including my well-wishers, my friends, colleagues and various institutions.

I would like to thank my seniors Dr Vandita Kakkar, Mr Anadi Mahajan, Dr Kaisar Raza, Dr Amit Bhatia, Dr Rishi Kapil, Dr Shantanu Bandyopadhyay, Ms Rumjhum, Ms Swati Bhandari, Mr Anshuman Shukla, Mr Basant for their appropriate guidance, lively deliberations, words of encouragement and support. I heartiest gratitudes to my seniors Dr Rohit Bhandari and Mr Manoj Kumar Verma for their affection and care when I was out of track.

Thanks to my juniors and friends Shilpa, Monika, Neha, Keshav, Gaurav, Simar, Harman Ikkehla, Ranjana, and Ramneek. Special thanks to Anurag, Mandeep, Parneet, and Gaurav Sharma for their immense help during the last stage of my thesis writing and printing. Special thanks to Harvinder for always being there. Thanks to you Sahil, without you it was not possible to complete the toxicity studies. I feel lucky to have Pramod as my most beloved junior and younger brother to me. He was there with me when I needed him the most.

My deep-rooted thanks to my senior and friend Mr Virag Sharma who always treated me like his younger brother and showed me the right path wherever I was in visor. Thanks to Poonam, Sheetu, Babita, Neeraj, Prataap, Mahaveer, Varun, Anand, Shilpi, Gurjeet, Gajanand, Ashish, Kunal Chadha who has always helped me, supported me and more importantly stood by my side through my fine and

appalling instances. Special thanks to Shweta for helping me in AFM studies. My sincere thanks are for my friends Rattandeep Singh, Pradeep Jadhavar, Ram Rattan, Amit Pal, Aditi, Amit, Kamalpreet, Ajeet, Abhinav, Archana, Shaveta, Shivani Didi who constantly inspired me during the course of my project.

I feel indebted towards my friend Gaurav Katoch who took care of me when I was not able to synchronize between work and personal life. A genuine thanks to my friend Priyanka Kaul for her moral support during the entire duration of my work.

Thanks to my fiancee, Ashima for her love and care during the last stages of my thesis, which gave me strength.

Words fail me to express my feelings of gratitude to my parents and my brother, who were a source of strength, perpetual inspiration and consistent help in all my accomplishments. Today, whatever I have achieved in my life, is just because of their efforts and sacrifices. My heartiest gratitude to Gurpal Uncle ji and Rani Aunty ji, who are next to my parents, for their support and love during this period. Thanks to my friend, Gurkisahan for his help in getting the research articles for my research work. Thanks to Simran for his technical expertise during my work.

Last, but certainly not the least, I thank the clerical, laboratory and technical staff of U.I.P.S., especially Mr Karam Singh, Ms Kiran, Ms Usha, Mr Sumit, Mr Vishnu, Ms Jaspal, Mr Mannmohan Sharda, Mr Chaman Lal, Mr Buta Singh, Mr Anil Sharma, Mr Shadi Lal, Mr Saroop, Mr Sham Singh, Mr Sahib Singh, Ms Pushpa, Mr Dinesh, Chetman ji for their constant help and assistance. I am highly grateful to Sushma mam for her help, affection and concern during the entire duration of my research work. I am thankful to Ms Maninder Kaur (CPBES), Mr Devilal and Ms Ranjit Kaur (DST Lab), Mr Mahesh, for their technical assistance during my experimental work. Analytical help from Mr Dinesh Sharma and Mr Jagtar Singh, CIL is also duly acknowledged. I also feel a sense of thankfulness towards the library staff of U.I.P.S., especially Mr Priyadarshan and Mr Dayal Chand for providing all the necessary books and journals to aid in my thesis work. My sincere thanks to the

security staff of UIPS for giving me the company during late hours of work. Special thanks to Nain Graphics, PU for timely printing of my thesis.

The proficiency in this study belongs to those accredited above. All mistakes are mine. For those whom I have failed to mention, I sincerely apologize, and I thank you from the bottom of my heart.

Financial grant received from DBT, New Delhi is highly acknowledged.

I pay homage to those experimental animals that sacrificed their lives in making my endeavor successful. May God grant them eternal peace and forgive me for the sin of killing them.

(Harinder Singh)
