CONTENTS

1 Introduction 1–50
   1.1 Optimization Problems and Some Related Concepts 2
   1.2 Summary of the Thesis 30

2 Cone Convex and Related Functions in Vector Optimization 51–106
   2.1 Cone Semistrictly Convex Functions 52
   2.2 Cone Subconvex Functions: Sufficiency and Duality 62
   2.3 Vector Optimization with Cone Semilocally Preinvex Functions 70
   2.4 Optimality and Duality in Vector Optimization involving Generalized Type-I Functions over Cones 89

3 Second Order Symmetric Duality in Vector Optimization 107–141
   3.1 Symmetric Duality for Multiobjective Programming using Second Order $(F, p)$ Convexity 108
   3.2 Second Order Symmetric Duality in Vector Optimization Over Cones 128

4 Higher Order Optimality and Duality in Vector Optimization 143–172
   4.1 Higher Order Duality in Multiobjective Fractional Programming with Support Functions 144
   4.2 Higher Order Optimality and Duality in Vector Optimization Over Cones 160

Scope of Further Research 173

References 175–194
