ACKNOWLEDGEMENT

It gives me immense pleasure to express my deep sense of gratitude and indebtedness to Prof. Mini Bhattacharyya, head of the department of Anthropology, Gauhati University for her expert guidance, valuable suggestions and all round help during the course of the investigation. It is a sweet memory to be remembered throughout my life to work under her able guidance and companionship.

I take this opportunity to express my heartfelt gratitude to professor and former head of the department. Dr. Rekha Das madam and all the faculty members of the department of Anthropology, Gauhati University for their informative suggestions and encouragement at various stages of the research work. I am especially thankful to Prof. Birichi K. Medhi of the same department for his kind advice from time to time. I am also grateful to my co researchers for their kind help.

The advice of the teachers of North Gauhati College and students of this college is gracefully acknowledged herewith.

I wish to extend my gratefulness and special thanks to all the people of my three villages in North Guwahati where I have undertaken my research. They helped me a lot and co-operated with me while collecting data. My appreciation goes to all the women who responded to my long survey schedule with great patience.

My sincere gratitude to all the doctors, technicians, nurses and health workers of the Primary Health Centre (PHC), Mini PHC and Sub-centre of North Guwahati.

I want to thank K. K. Handique Library of Gauhati University and Department of Anthropology Library, Gauhati University who helped me by providing books, journals, references etc.

I offer my special thanks to Dr. Dilip Kalita of the Department of Population Research Centre, Gauhati University and staff of Women’s Study Research Centre, Gauhati University. I never forget their kind help and support by providing books and reports.

The acknowledgement cannot be concluded without expressing appreciation to my parents Mr. Keshab Sarmah and Mrs. Minu Devi and my loving brother Mr. Pulak Sarmah whose inspiration and encouragement helped me a lot to bring out the thesis in to final form. I thank almighty God for giving me strength and patience to complete this work.

Last but not least, I offer my sincere thanks to Sanjib Roy for meticulously typing this thesis in its present form.

PREFACE

Health is the principal asset of human being. Ever since the emergence of man on the earth disease and illness have become perennial problems for mankind. The concept of health of the tribals and their medical system always involve social, cultural and environmental issues. In this research work, an attempt has been made to study the reproductive health seeking behavior of the Boro-Kachari women. People in every society, whether simple or complex, adapt to their environment by way of combining various biological and socio-cultural resources. The fact that diseases are related to biological and socio-cultural factors has resulted in the convergence of medical and anthropological interests. To understand the aspects of reproductive health seeking behavior of the people, an attempt has been made to find out the general pattern of the different type of treatment and healing options during the course of reproductive illness, and the perceptions regarding the outcome of such treatment and healing interventions among the Boro-Kachari women of North Guwahati area.

Outline of the work under different chapters of the thesis are given below:

Chapter – I which is the Introduction, an attempt has been made to introduce the background of the topic in its proper perspective. It embodies discussion on the problem under study, objectives, hypothesis, sample, rationale for selection, scope of the study, fieldwork and methodology and review of literature.

Chapter – II provides a brief outline of the Bodos of Assam where their history, origin, migration, socio-cultural life of the Bodos is mentioned. In addition, a descriptive account of the Boro-Kacharis of North Guwahati area is also given. It also gives an outline of the health facilities available in North Guwahati area.

Chapter – III it deals with the concept and approaches of reproductive health and role of National Rural Health Mission in reproductive health.

Chapter – IV contains elaborate discussions on traditional health practices as well as reproductive health seeking behaviour of Boro-Kachari women in North Guwahati area.

Chapter – V presents an overall summary, major findings and conclusion of the study.
