Chapter 1. Introduction to aldol reaction and synthetic studies towards 1-Deoxythionojirimycin

Section 1. Introduction to aldol reaction
1.1.1 Aldol reaction 01
1.1.2 Catalytic Asymmetric Aldol Reaction 06
1.1.3 Aim of the Thesis and survey of the contents 32

Section 2. Synthetic studies towards 1-Deoxythionojirimycin
1.2.1 Introduction 42
1.2.2 Literature review for 1-deoxythionojirimycin 43
1.2.3 Present work 45
1.2.4 Result and discussion 48
1.2.5 Conclusion 63
1.2.6 Experimental 64
1.2.7 Analytical data 79
1.2.8 References 109
Chapter 2. Synthetic studies towards 1,4-anhydro-4-thio-D-arabinitol and formal synthesis of Salacinol, Salaprinol and Neosalaprinol

2.1 Introduction 112
2.2 Inhibitory activities of thiosugars isolated from *Salacia* species 114
2.3 Literature review for 1,4-anhydro-4-thio-D-arabinitol, Salacinol, Salaprinol and Neosalaprinol 115
2.4 Present Work 121
2.5 Result and discussion 122
2.6 Conclusion 133
2.7 Experimental 134
2.8 Analytical data 143
2.9 References 162

Chapter 3. Synthetic studies towards seven membered thiosugar and thio-mimic of Isofagomine

Section 1. Synthetic studies towards seven membered thiosugar

3.1.1 Introduction 164
3.1.2 Intramolecular Aldolization reaction of 1,8-dicarbonyl compounds 164
3.1.3 Present work 167
3.1.4 Result and discussion 168
3.1.5 Conclusion 173
3.1.6 Experimental 174
3.1.7 Analytical data 178
3.1.8 References 184
Section 2. Synthetic studies towards thio-mimic of Isofagomine

3.2.1 Introduction 186
3.2.2 Present work 186
3.2.3 Result and discussion 187
3.2.4 Conclusion 193
3.2.5 Experimental 194
3.2.6 Analytical data 200
3.2.7 References 208

Chapter 4. Introduction to ionic liquids, synthesis of crown ether and imidazolium based novel ionic liquids and development of ionic liquid mediated organic transformations

Section 1. Introduction to ionic liquids

4.1.1 Introduction 209
4.1.2 Solvent alternatives for chemical synthesis 209
4.1.3 Classification of ionic liquids 213
4.1.4 Recent developments in cations and anions 213
4.1.5 Features of ILs which make them as attractive potential solvents 216
4.1.6 Applications of ionic liquids 216
4.1.7 References 220

Section 2. Synthesis of crown ether and imidazolium based novel ionic liquids

4.2.1 Introduction 228
4.2.2 Present work 229
4.2.3 Result and discussion 230
4.2.4 Conclusion 234
4.2.5 Experimental 235
4.2.6 Analytical data 243
4.2.7 References 263

Section 3. [Bbim]Br mediated N-Boc protection of alkyl/aryl amines

4.3.1 Introduction 265
4.3.2 Present Work 265
4.3.3 Result and discussion 266
4.3.4 Conclusion 271
4.3.5 Experimental 272
4.3.6 Analytical data 279
4.3.7 References 306

Section 4. [Bbim]Br mediated synthesis of 1,3,5-triphenyl-1H-pyrazoles

4.4.1 Introduction 307
4.4.2 Present work 308
4.4.3 Result and discussion 309
4.4.4 Conclusion 312
4.4.5 Experimental 313
4.4.6 Analytical data 316
4.4.7 References 325
