Chapter 5

5A. OBSERVATIONS AND RESULTS

5A.1. Demographics

5A.2. Distribution of blood isolates according to the service

5A.3. Frequency of occurrence of microorganisms causing septicemia (year wise)

5A.4. Antibiogram of isolates from septicemia patients during five years period (year wise)

5A.5. Antimicrobial resistance pattern in Gram-positive and Gram-negative bacteria isolated from septicemia patients

5A.6. Comparative incidences of antimicrobial resistance in Gram-positive microorganisms

5A.7. Comparative incidences of antimicrobial resistance in Gram-negative microorganisms

5A.8. Percentage distribution of resistance pattern in Gram-positive bacteria to antimicrobial agents

5A.9. Percentage distribution of resistance pattern in Gram-negative bacteria to antimicrobial agents

5A.10. Resistance in Gram-positive microorganisms to antimicrobial drugs

5A.11. Resistance in Gram-negative microorganisms to antimicrobial drugs

5A.12. Multidrug resistance in Gram-positive bacteria

5A.13. Multidrug resistance in Gram-negative bacteria

5A.14. Gender distribution of septicemia induced death

5A.15. Antimicrobial cost analysis of septicemia patients

Chapter 6

6A. DISCUSSION

Chapter 7

7A. SUMMARY AND CONCLUSIONS
PART-B PROSPECTIVE ANALYSIS OF SEPTICEMIA CASES ADMITTED
AT MAJEEDIA HOSPITAL (July 2009-December 2009)

Chapter 3

3B. AIMS AND OBJECTIVES

3.1. Study Envisage

Chapter 4

4B. STUDY DESIGN AND METHODOLOGY

4B.1. Study design
4B.2. Study population
4B.3. Diagnostic criteria for septicemia
4B.4. Data collection procedure
4B.5. Details of selection of cultures and culture media
4B.6. Blood collection and organism identification
4B.7. Susceptibility testing
4B.8. Measurement of the zone of inhibition of different drugs
4B.9. Measurement of the sensitivity and resistance of drugs
4B.10. Statistical analysis

Chapter 5

5B. OBSERVATIONS AND RESULTS

5B.1. Antimicrobial susceptibility analysis of 186 septicemia patients
5B.2. Patients demographics
5B.3. Distribution of blood isolates according to the service
5B.4. Frequency of occurrence of microorganisms causing septicemia
5B.5. Images of zone of inhibition of different drugs
5A.6. Antibiogram of isolates from septicemia patients during July 2009-December 2009
5B.7. Antimicrobial resistance pattern in Gram-positive and Gram-negative bacteria isolated from septicemia patients
5B.8. Comparative incidence of antimicrobial resistance in Gram-positive microorganisms
5B.9. Comparative incidence of antimicrobial resistance in Gram-negative microorganisms

5B.10. Resistance in most common Gram-positive microorganisms to antimicrobial agents

5B.11. Resistance in most common Gram-negative microorganisms to antimicrobial agents

5B.12. Difference in rates of resistance during retrospective and prospective study period

5B.13. Multidrug resistance in Gram-positive bacteria

5B.14. Multidrug resistance in Gram-negative bacteria

5B.15. Pharmacotherapy of septicemia patients

5B.16. Clinical signs and symptoms of the patients

5B.17. Patient outcome and cost analysis of septicemia therapy

5B.18. Adverse drug reactions during antimicrobial therapy of septicemia

Chapter 6
6B. DISCUSSION

Chapter 7
7B. SUMMARY AND CONCLUSIONS

Chapter 8
