ACKNOWLEDGEMENTS

It is a great pleasure to express my gratitude and sincere thanks to all those who helped me directly and indirectly to complete this work. This thesis would not have been possible without all these people and their constant encouragement.

First of all, I would like to express my immense and sincere gratitude to my research supervisor, Dr. Bharat B. Kale for his constant support and guidance throughout my research work. I really admired the way he handled scientific and non-scientific things with utmost perfection and sincerity. There isn’t doubt that I learnt many things from him, especially how to analyze and get valuable information even from small things, and how to solve a problem. My heartfelt thanks for his valuable time in bringing this output and given shape to this thesis in the perfect manner.

I could not find enough words to thank the efforts and input rendered by my research co-supervisor, Dr. Milind V. Kulkarni to bring this thesis to this stage. The enthusiasm and interest he paid to resolve any technical problems is an inspiration for me. He is one of the genuine, humble and down-to-earth people I have seen. Many thanks to him for his effort to teach many scientific things which can be seen as an output in this thesis.

I owe my deepest gratitude to Dr. Tukaram S. Thopate who introduced me to the research world by giving an opportunity in this prestigious laboratory. Also, I would like to express my wholehearted thanks for his personal support and care during my difficult situations.
