## List of Figures

2.1 Fuzzy Set Representation .................................................. 7
2.2 A threshold element as an analog to a neuron ......................... 9

3.1 Steps of KDD ......................................................................... 20
3.2 Steps of clustering process ................................................... 23

4.1 Single layer competitive network ........................................... 62

5.1 Partitioning of the Data._6.2 data set with different number of split in $k$-$d$ tree ................................................................. 90
5.2 Scatter plots of the Data._6.2 and Datam._6.2 data sets ............... 93
5.3 Scatter plots of the Data._4.2 and Data._4.3 data sets .................. 94
5.4 Performance of the $pshFCM$, psFCM and the FCM clustering algorithms for the Data._6.2 and Datam._6.2 data sets .............. 101
5.5 Performance of the $pshFCM$, psFCM and the FCM clustering algorithms for the Datam._4.2 and Data._4.3 data sets ................ 102

6.1 Scatter plots of the Data._3.2 and Data._5.2 data sets .................. 111
6.2 Scatter plots of the Elliptical._10.2 and Diabetes data sets ........... 112
6.3 Scatter plots of the DataX1 and DataX2 data sets ...................... 114
6.4 Scatter plots of the DataX3 and DataX1N data sets. .................. 115
6.5 Contour maps of the clustering results for the Data.5.2 data set validated by the $XBF$ and the $v_{FSBT}$ validity indices. .................. 121
6.6 Contour maps of the clustering results for the Data.6.2 data set validated by the $XBF$ and the $v_{FSBT}$ validity indices. .................. 122
6.7 Contour maps of the clustering results for the Elliptical.10.2 data set validated by the $XBF$ and the $v_{FSBT}$ validity indices. .................. 126
6.8 Contour maps of the clustering results for the DataX1 data set validated by the $v_K$, $PBMF$, $XBF$, $PC$, $MPC$ and the $v_{FSBT}$ validity indices. .................................................. 132
6.9 Contour maps of the clustering results for the DataX2 data set validated by the $v_K$, $PBMF$, $XBF$, $PC$, $MPC$ and the $v_{FSBT}$ validity indices. .................................................. 133
6.10 Contour maps of the clustering results for the DataX3 data set validated by the $v_K$, $PBMF$, $XBF$, $PC$, $MPC$ and the $v_{FSBT}$ validity indices. .................................................. 134
6.11 Contour maps of the clustering results for the DataX1N data set validated by the $v_K$, $PBMF$, $XBF$, $PC$, $MPC$ and the $v_{FSBT}$ validity indices. .................................................. 135
6.12 Performance of different validity indices for the DataX1 data set. .. 136
6.13 Performance of different validity indices for the DataX2 data set. .. 137
6.14 Performance of different validity indices for the DataX3 data set. .. 138
6.15 Performance of different validity indices for the DataX1N data set. .. 139
