ACKNOWLEDGEMENTS

This thesis is the end of my journey in obtaining my Ph.D. which has been kept on track and been seen through to completion with the support and encouragement of numerous people including my well wishers, my friends, colleagues and various institutions. Now finally is the time when I would like to thank all those people who made this thesis possible and an unforgettable experience for me.

Today I wish to thank the Almighty whose benediction and grace has made this research work possible. I pray that this hidden force will always give me strength, courage, wisdom and will power to face all the challenges of life.

At this moment of accomplishment, first of all I express my deep sense of gratitude to my revered teacher, guide, and mentor Prof. Malwinder Ahuja (Department of Education, Panjab University Chandigarh). Merits volumes of appreciation and thanks for her unstinted help, immaculate guidance, keen interest, expert evaluation, constructive criticism and her extensive discussions and above all her commitment to discovery and testing of new methods around my work have helped me in making this research work a logical conclusion. Working with her was a great experience. I also extend my sincere gratitude towards my guide Dr. Manju Gera (USOL, Panjab University Chandigarh) under her guidance, support and encouragement I successfully overcame many difficulties and learned a lot.

I wish to thank Chairperson Dr. Nandita, (Department of Education, and Panjab University Chandigarh) for providing me necessary infrastructure and resources to accomplish my research work. My thanks are due to Dr. Kirandeep Kaur and Dr. Latika, (Department of Education, Panjab University, Chandigarh) for their valuable suggestions, untired help, constant support and encouragement.

This list is incomplete without acknowledging Mr. Sumit Garg (Principal G.S.S.S, Bhagsar, Mukatsar) who was the source of inspiration for me in my early days and who taught me many things.
I am thankful to Dr. Vikas, Director Pine Grove Group of Institutes, Dr. Vishal, Principal Pine Grove College of Education for their support during my experimentation.

A journey is easier when you travel together. Interdependence is certainly more valuable than independence. This thesis is the result of constant and unending support of my Sister, Ms. Vompi Singla who stood by my side like a pillar from the very first day till the submission and my youngest sister Ms. Preeti Singla for all her technical, moral support and generous care.

I am really thankful to two of my friends Ms. Aparna Mishra and Shruti Jain who were always there when I needed. Thank you doesn't seem sufficient but it is said with appreciation, love and gratitude for their support, encouragement, care, understanding and precious friendship. They were always beside me during the happy and hard moments to push me and motivate me. I can see the good shape of my thesis because of their help and suggestions in formatting the entire thesis.

It is also a pleasure to mention all my erudite friends, Priyanka, Esha, Anchal, Malika, Richa, Ritu, Hardeep, Shweta, Rajni, Pawan, Anupreet, Pawandeep, Manjeet, Dr. Deependra Nath, Dr. Govind and Savita mam for their love, care, support and creating a pleasant atmosphere for me in and around my work place.

During the inevitable ups and downs of conducting my research my friend Maninder Kaur often reminded me life's true priorities by what could be the influence of a loving God through 'Buddhism Practice'. This helped me a lot to work for hours together tirelessly. I doubt that I will ever be able to convey my appreciation fully, but I owe her my eternal gratitude.

It’s my fortune to gratefully acknowledge the support of some special individuals. Words fail me to express my appreciation to Malik mam, Geeta Dwivedi mam and three of my aunts Ms. Mohini, Ms. Santosh Bansal and Ms. Indu Singla for their support and generous care.

I owe my gratitude to all my family members Dimple and Ashish, Hitasha and Anshuman and Nidhi and Anurag who enabled me to complete this thesis and provided a wonderful time along the way in the form of night out from the hostel and showing various movies for a change.
And my nieces Kashish and Akanksha who always asked massi how much is left, do we help? Further another addition in the family with Ananya as my niece who spoilt my work by flipping the keys of my laptop and on my scolding passed me cute smile kept me going. I wish I could mention each individually, but will throw a large party instead.

I would like to thank and acknowledge the Principals and faculty members of the schools who permitted me to collect data during the pilot and final study. I would also like to thank all those students who participated as subjects. Without their consent and participation this research would not have been completed.

I am also thankful to all the researchers and authors whose work I have used and quoted in my research report and without which it would not have been possible to link the missing gaps.

I would like to show my gratitude to Mr. Saroj Rana who helped me in data analysis and Mr. Surinder Kumar, Mr. Manohar Lal and Mr. Ravi Chandra who provided me technical assistance in drafting of the thesis.

Last but not least, I would like to pay high regards to my mother Mrs. Sushila Singla and father Mr. Surinder Singla, brother Ankush, Nishith and nephew Ishaan Ashley Goel for their sincere encouragement and inspiration throughout my research work and lifting me uphill during this phase of life. I owe everything to them. Besides this, several people have knowingly and unknowingly helped me in the successful completion of this project.

I am thankful to Sarkarji: my friend, philosopher and guide.

Above all, I thank the Almighty for everything He blesses me with.
