C-15: Balance of tourism flows between India and the East Asian four (in persons).

C 15A: Balance of tourism between India and the four East Asian countries in relative terms.

C-16: Balance of tourism flows between India and Japan (in persons).

C-17: Balance of tourism flows between India and Republic of Korea (in persons).

C-18: Balance of tourism flows between India and Singapore (in persons).

C 19: Balance of tourism flows between India and Malaysia (in persons).

D-1: Number of respondents by age.

D-2: Number of respondents by gender.

D-3: Number of respondents by marital status.

D-4: Number of respondents by educational level.

D-5: Number of respondents by occupation.

D-6: Prime attractions of tourists.

D-7: Nature of tour party.

D-8: Duration of stay.

D-9: Tourists rating of the parameter "tourist attraction".

D-10: Tourists rating of the parameter "status of air connectivity with tourists' home country and the air tariff".

D-11: Sample tourists rating of the parameter "Visa and Immigration formalities".
D-12: Sample tourists rating of the parameter “quality of accommodation”.

D-13: Sample tourists rating of the parameter “ambience”.

D-14: Sample tourists rating of the parameter “hygiene”.

D-15: Sample tourists rating of the parameter “up-keep of tourist Sites”.

D-16: Sample tourists rating of the parameter “accommodation tariff”.

D-17: Sample tourists rating of the parameter “availability of medicinal & health care facilities”.

D-18: Sample tourists rating of the parameter “security measures by local administration”.

D-19: Sample tourists rating of the parameter “food and catering”.

D-20: Sample tourists rating of the parameter “food prices”.

D-21: Sample tourists rating of the parameter “shopping facilities and souvenirs”.

D-22: Sample tourists rating of the parameter “public transport facilities (air, rail & road transport)”.

D-23: Sample tourists rating of the parameter “quality of roads (in destination country)”.

D-24: Sample tourists rating of the parameter “time required for travel”.

D-25: Sample tourists rating of the parameter “co-operation from tourist information centres”.

D-26: Sample tourists rating of the parameter “availability of travel agents & local tour operators”.

D-27: Sample tourists rating of the parameter “attitude of the local people”.

D-28: Sample tourists rating of the parameter “recreational facilities”.

D-29: Summary of the tourists’ rating of the destination-dimensions.

D-30: Destinations dimensions considered important by tourists.

D-31: Destination dimensions arranged by category and importance attached.
E1: The calgary model of competitiveness in tourism.

E-2: Adopted framework for measuring competitive strength of destination.

F-1: Destination-attraction index for India and the five destination countries most popular among the Japanese tourists (in 2007-08).

F-3: Destination-attraction index for India and the five destination countries most popular among the Singaporean tourists (in 2007-08).

F-4: Destination-attraction index for India and the five destination countries most popular among the Malaysian tourists (in 2007-08).

F-5: Destination-attraction index.

F-6: Tourism openness index for India and the five destination countries most popular among the Japanese tourists (in 2007-08).

F-7: Tourism openness Index for India and the five destination countries most popular among the Korean tourists (in 2007-08).

F-8: Tourism openness index for India and the five destination countries most popular among the Singaporean tourists (in 2007-08).

F-9: Tourism openness index for India and the five destination countries most popular among the Malaysian tourists (in 2007-08).

F-10: Destination Openness Index for India and the eight selected destinations.

F-11: Tourists' safety and security index for India and the five destination countries most popular among the Japanese tourists (in 2007-08).

F-12: Tourists' safety and security index for India and the five destination countries most popular among the Korean tourists (in 2007-08).

F-13: Tourists' safety and security index for India and the five destination countries most popular among the Singaporean tourists (in 2007-08).
F-14: Tourists’ safety and security index for India and the five destinations countries most popular among the Malaysian tourists (in 2007-08).

F-15: Tourists’ safety & security index for India and the eight selected destinations.

F-16: Connectivity index for India and the five destination countries most popular among the Japanese tourists (in 2007-08).

F-17: Connectivity index for India and the five destination countries most popular among the Korean tourists (in 2007-08).

F-18: Connectivity index for India and the five destination countries most popular among the Singaporean tourists (in 2007-08).

F-19: Connectivity index for India and the five destination countries most popular among the Malaysian tourists (in 2007-08).

F-20: Connectivity index for India and the eight selected destinations.

F-21: Infrastructure & price competitiveness index for India and the five destination countries most popular among the Japanese tourists (in 2007-08).

F-22: Tourism Infrastructure & price competitiveness index for India and the five destination countries most popular among the Korean tourists (in 2007-08).

F-23: Tourism infrastructure & price competitiveness index for India and the five destination countries most popular among the Singaporean tourists (in 2007-08).

F-24: Tourism infrastructure & price competitiveness index for India and the five destination countries most popular among the Malaysian tourists (in 2007-08).

F-25: Tourism infrastructure & price competitiveness index for India and the selected eight destinations.

F-26: Disaggregation of the tourism infrastructure & price competitiveness index for Hong Kong, Thailand, Indonesia and India.

F-27: Composite destination strength index.

F-28: Intensity of East Asian tourist-outflow towards the selected destination.
F-29: Chi-square test against Hypothesis (i).
F-30: Chi-square test against Hypothesis (ii).
F-31: Chi-square test against Hypothesis (iii).
F-32: Chi-square test against Hypothesis (iv).
F-33: Chi-square test against Hypothesis (v).
F-34: Chi-square test against Hypothesis (vi).
F-35: The three destinations in Asia-Pacific region most popular among the outbound visitors in the selected four East Asian countries.
F-36: India’s areas of weakness as a tourism destination.
F-37: Areas of weakness of India by pillar.
F-38: Specific areas of weakness demanding priority attention.

LIST OF CHARTS
II. 1: Sectors/components of tourism industry.
III.1: Trend of tourist inflows from the four East Asian countries to India: 1991-2008.
