ACKNOWLEDGMENTS

Though only my name appears on the cover of this thesis, a great many people have contributed to its production. I owe my gratitude to all those people who have made this thesis possible and because of whom my graduate experience has been one that I will cherish forever. Thanks to Almighty for the wisdom and perseverance that he has been bestowed upon me during this research, and indeed, throughout my life: "I can do everything through Him who gives me strength."

My first debt of gratitude must go to my Supervisor Professor Jaspal Singh for the continuous support during my study and research, for his patience, motivation, enthusiasm and immense knowledge. His guidance helped me in all the time of research and writing of this thesis. I could not have imagined having better advisor and mentor for my Ph.D study.

Special thanks to Professor Rattan Singh for his unflagging encouragement and serving as a role model to me. He provided me vision, encouragement and necessary advice for me to proceed through the doctoral program. I would also like to thanks all my teachers, who throughout my educational career have supported and encouraged me to believe in my abilities.

I am grateful to S. Prabhdial Singh Randhawa for his encouragement and practical advice. I am also thankful to him for reading my reports; commenting on my views and helping me understand and enrich my ideas.

Many friends have helped me stay sane through these difficult years. Their support and care helped me overcome setbacks and stay focused on my doctoral study. I greatly value their friendship and I deeply appreciate their belief in me.

Last but not the least; I would like to thanks my family: my parents for giving birth to me and supporting me spiritually throughout my life. Their love provided my inspirations and was my driving force. I owe them everything.

Varinder Singh
