Acknowledgements

I would like to express my deep gratitude to my doctoral committee chairman, my supervisor, philosopher, and good friend T. Ganesh, for his enthusiastic guidance and continuous support to my research. Without his guidance and persistent help, this doctoral dissertation would not have been possible. I sincerely appreciate his contribution of time, ideas, and funding towards my Ph.D. The experience of being with him has been productive and stimulating. The joy and enthusiasm he has shown towards research has been contagious and motivational for me, especially during tough times in my doctoral pursuit.

I would like to thank the committee members: Robert Chandran, R. Ganesan, and Siddhartha Krishnan, for their support and critical comments throughout my research and I greatly benefitted from their comments and inputs while writing the thesis. R. Ganesan introduced me to plant taxonomy and developed my interest in the field. He has spent days with me identifying plant species either in the field nursery or the herbarium. I am also thankful to Bejoy K. Thomas who helped me with his critical comments in the initial stages of my research, while I was developing social science methods.

I grateful to Priyadarshan and his Vembanad wetland team, for helping me during my stakeholder perception survey in Kerala. I am also thankful to Kishore and Murgan for their assistance in the field, and helping me to communicate with plantation stakeholders in the local language, Malayalam. I would like to thank Seena who helped me translate many old Malayalam repository documents into English.

I would like to thank Soubadra Devy, for her constant encouragement and inspiration during tough times in my Ph.D. pursuit, and also thankful to Kavitha, A. and B.C. Nagaraja, for their encouragement and valuable suggestions, both in the field and during thesis-writing.

I gratefully acknowledge the funding sources that made my Ph.D. work possible. I was funded by the Norwegian student fellowship in the initial 4 years and ATREE Fellow contingency grants to T. Ganesh. My field work was supported by the Rufford small grant, UK (2007) and Norwegian small grant to assess the plantation stakeholder perceptions during 2010–11. I thankful to Krishi
Vignana Kendra (KVK), Kodagu and National Bureau of Soil Survey and Land Use Planning (NBSS & LUP), Bangalore for soil sample analysis.

I would like to thank the Tamil Nadu forest department, for granting me permission to carry out the study on abandoned tea plantations. I also thank Mr. Sunder Raju, IFS and Mr. Rakesh Vasisht, PCCF and Wildlife Warden for their encouragement to carry out this study and former field director of KMTR Mr. Ramkumar, IFS., Mr. Malleshappa, IFS., and Mr. Sanjay Kumar Srivastava, IFS, Field Director and CCF. I am thankful to Deputy Directors of KMTR, Mr. Bathraswamy (Kalakad range) and Mr. Venkatesh (Mundanthurai range); range forest officers, Mr. Krishnan (Kalakad), Mr. Devasagayam (Thirukannangudi), and Mr. Armughan (Ambasamudram) for their support while entering the protected areas and all the forest staff and fire-watchers. I wish to convey my special thanks to Sunder from Kalakad (fire-watcher), who helped me explore new forest trails to reach abandoned plantations. I would like to thank Tamil Nadu Electricity Board, Upper Kodayar for logistic support and BBTC for generously providing rainfall data and allowing access to their plantation roads.

I thankful to ATREE Academy coordinators during the tenure of my Ph.D. programme: Robert Chandran, Aravind Madhyastha and Gladwin Joseph, Ganesan Balachander and Madhavi (Assistant coordinator), they were always ready to facilitate my Ph.D. work. I greatly enjoyed the courses I took up at ATREE and elsewhere as part of my Ph.D. These courses helped me to think critically. Jagadish Krishnaswamy, Robert Chandran, Nitin Rai, Gladwin Joseph, Siddhartha Krishnan, Sharadchandra Lele and Karthik Shanker from IISc conducted courses at ATREE which were very useful to me and I also benefitted from the statistics and experimental design course conducted by Jason Tylianakis as part of the Association for Tropical Biology and Conservation meeting held at Malaysia in 2008.

Special thanks to Mathivanan – ACCC field coordinator, Singampati, who helped me in several ways, while I was in remote field sites, he helped me right from recharging mobiles (currency top-up) to finding field assistants for the field work. His contributions are priceless and he helped me in taking care of my nursery and maintenance and coordination of watering by providing assistants. My field data collection went on smoothly because of him. Thanks to all those who helped in maintaining my nursery by watering plants. Without their help, I would not have obtained good results for my thesis; thanks to Balamurugan, Johnson, Tamilazaghan, and Ruthamma.
I thank my friends and colleagues at ATREE and elsewhere, Kottaimuthu, Sarvanan, V. Ganesan, Jayanth, Allwin, Seshadri, Vivek, Paramesha, Jagadish, Obaiah, Rajkamal, Aditya, Urbasi, Anirban Roy, Amogh, Patrick, Selwyn, Kiran, M. C., Savitha, Jahnavi and Abhisheka for their support and encouragement and Prashanth and Jyalakshmi from Eco-informatics lab for providing detailed study area maps and Ravi helped me with many analyses and get over difficulties in R program. I really appreciate each one for their timely help.

I am thankful to all ATREE staff and colleagues. Special thanks to Saji, for looking into my computer problems. I am very grateful to Gopi and his accounts team for their timely help in settling bills and reimbursement and Ramesh (Office manager) and Lakshmikanth helped me in many ways during the tenure.

I thank field assistants –John, Karthik, Ramesh, Jayapal, Marimuthu, Pandian, Murughan, Ravi, Krishan, Yesaki and Green brigade school volunteers and more than 50 field assistants in the age group of 20 to 60 years. I had a great time with them while camping inside the forest. I really enjoyed the evening camp-fires, especially cooking! I learnt a lot from them, their innocence, respect, and hard-work. I had good fun while coordinating with them and thank them all for the wonderful experience, and I am thankful to Rajan, Nalmuk hotel, for timely food and local support and Mani, Kodayar for friendly approach and logistic support.

I would like to thank each one of the families of Keshava, Ramesh, Tharachandra, H. Ramesh, Rajesh and Appanna Gowda for timely support, and encouragement. Lastly, I would like to thank my grand-mother and mother for all their love and encouragement: who raised me with a love for science and supported me in all my pursuits; and most of all my loving and patience wife Advhi, whose encouraging support during the final stages of the Ph.D. is well-appreciated. Thank you!
