List of Figures

Fig 1: Basic structures of representative SCCmec elements
Fig 2: Genetic structure of SCCmec V
Fig 3: Worldwide distribution of dominant clones of CA-MRSA along with presence or absence of pvl.
Fig 4: Distribution of various CA-MRSA clones in Asian countries
Fig 5: CDC’s recommended 5 C strategies to prevent spread of CA-MRSA
Fig 6: Emergence of CA-MRSA from MSSA by acquiring prophage mediated pvl genes
Fig 7: Mechanism of PVL in the pathogenesis of infection
Fig 8: Mechanism of PVL mediated tissue necrosis
Fig 9: PVL at high concentration causing tissue necrosis
Fig 10: Sublethal concentration of PVL leading to apoptosis
Fig 11: Role of PVL in the pathogenesis of necrotising pneumonia
Fig 12: Other factors of virulence of CA-MRSA
Fig 13: Virulence factors of S.aureus
Fig 14: Result of clindamycin induction testing of S.aureus by disk diffusion
Fig 15: Abscess with central necrosis caused by CA-MRSA
Fig 16: Impetigo on scalp and neck caused by CA-MRSA
Fig 17: Impetigo on left shoulder caused by CA-MRSA
Fig 18: Furuncle on the right hand caused by CA-MRSA
Fig 19: Secondary bacterial infection of cellulitis of right leg
Fig 20: Secondary infection of allergic contact dermatitis on both feet
Fig 21: Secondary bacterial infection of allergic contact dermatitis on right foot
Fig 22: Isolation of CA-MRSA from different clinical specimens
Fig 23: Detection of MRSA using cefoxitin 30µg disk diffusion test
Fig 24: Antibiotic resistance pattern of CA-MRSA isolated from clinical specimens
Fig 25: Multidrug resistance to non β-lactam antibiotics among CA-MRSA

Fig 26: CA-MRSA showing cMLS\textsubscript{B} phenotype

Fig 27: CA-MRSA showing iMLS\textsubscript{B} phenotype

Fig 28: CA-MRSA showing MS\textsubscript{B} phenotype

Fig 29: Determination of MIC of vancomycin to CA-MRSA by agar dilution method

Fig 30: Result of Uniplex PCR for standardization of PCR Technique

Fig 31: SCC\text{mec} typing of CA-MRSA isolated from clinical specimens

Fig 32: Presence of \textit{pvl} gene among CA-MRSA isolated from clinical specimens

Fig 33: Multiplex PCR for the detection of \textit{mecA}, SCC\text{mec} types III-V and \textit{pvl} genes

Fig 34: Multiplex PCR for the detection of \textit{mecA}, SCC\text{mec} types III-V and \textit{pvl} genes

Fig 35: Multiplex PCR for the detection of \textit{mecA}, SCC\text{mec} types III-V and \textit{pvl} genes

Fig 36: Multiplex PCR for the detection of \textit{mecA}, SCC\text{mec} types III-V and \textit{pvl} genes

Fig 37: Antibiotic resistance pattern of CA-MRSA (n=31) isolated from nasal swabs

Fig 38: Multidrug resistance to non β-lactam antibiotics among nasal isolates of CA-MRSA

Fig 39: SCC\text{mec} typing of CA-MRSA isolated from nasal swabs

Fig 40: SCC\text{mec} types among CA-MRSA isolated from clinical specimens and nasal swabs
