A SELECT BIBLIOGRAPHY

1. The bibliography is divided in two parts. The first part includes books, reports, etc. and the second part includes papers, articles etc.

2. Within these two parts, the "all-through" principle is used. The entries are arranged alphabetically, taking the surname/s of the author/s as the guiding feature. (Names are used where surnames do not exist.) Next to the surnames the initials or names are used to assist the process of alphabetisation.

3. The publication data of the entries have been furnished as completely and accurately as possible.
