Dear Friends,

Corruption has become rampant in today's society in almost every walk of life. Day in and day out we learn through public media and also in our personal life about the corruptional practices and modes followed by the people holding public offices and other areas of activities. Corruption has reached such a level in our society that it has become a "way of life". In order to understand how the educated section of population in our society understands the phenomenon of corruption the present study is undertaken.

The main objective of the study is to know from the Final year Post Graduate students and Research scholars in various academic disciplines in two Universities (K.U.D & U.A.S) in Dharwad in terms of their attitudes and perception of corruption with their day-to-day practices in the frame work of their conceptual understanding as to how you are disposed to think and feel about such issues. Though this study is undertaken in a specific context its findings will have a wider bearing on the perception of Post Graduate students & Research scholars in similar contexts. It would be appreciated if you could help us by answering all the questions, as it would enable us to obtain a clear picture about the way P.G students & Research scholars, like you, can judge about the perception of others on the basis of relevant imagination attitudes. We assure you that all the information given by you will be kept confidential and be used only for scientific purpose.

Dharwad
Date.
