I - PUC: District level annual exam:
Total Percentage of Marks in II PUC Mid-Term Exam:
Name and address of the college:

DESCRIPTION

This is a test designed to measure the Cognitive style of the PUC students. Test consists of 2 parts- part-1 of 10 items and part-2 of 10 items. The instructions for each test are provided suitably. Go through them carefully and answer the same.

General Instructions

- Do not open the booklet before you are told to do so.
- You will have exactly 6 minutes to do the whole test.
- Study the given examples carefully.
- Try and answer all questions.
- Mark for the correct answer in the space given.

Note: your answers will be kept confidential and will be used for research purpose only.
PAPER FOLDING TEST (PFT)

In this test you are to imagine the folding and unfolding of pieces of paper. In each problem in the test there are some figures drawn at the left of a vertical line and there are others drawn at the right of the line. The figures at the left represent a square piece of paper being folded, and the last of these figures has one or two small circles drawn on it to show where the paper has been punched through all the thicknesses of paper at that point. One of the five figures at the right of the vertical line shows where the holes will be when the paper is completely unfolded. You are to decide which one of these figures is correct and draw an x through that figure.

Now try the sample problem below. (In this problem only one whole was punched in the folded paper.)

The correct answer to the sample problem above is C and so it should have been marked with an X. The figures below show how the paper was folded and why C is the correct answer.

In these problems all of the folds that are made are shown in the figures at the left of the line, and the paper is not tuned or moved in any way except to make the folds shown in the figures. Remember, the
answer is the figure that shows the positions of the holes when the paper is completely unfolded.

Your score on this test will be the number marked correctly minus a fraction of the number marked incorrectly. Therefore, it will not be to your advantage the guess unless you are able to eliminate one or more of the answer choices as wrong.

You will have 3 minutes for each of the two parts of this test. Each part has 1 page, when you have finished part 1, STOP. Please do not go on to part 2 until you are asked to do so.

DO NOT TURN THIS PAGE UNTIL ASKED TO DO SO
