ACKNOWLEDGEMENTS

This research work has been accomplished by me under the precious and meticulous guidance of my research guide Dr. P. S. Mundinamani, professor of Economics and Director, UGC–Academic staff college, Karnataka University, Dharwad. I am finding the paucity of words, to express how deeply I am indebted to him. Throughout the course of the present study, he was a perennial source of inspiration and constant encouragement in all my academic endeavours. Notwithstanding, the extremely busy schedule of preoccupations he always carried in his twin capacities, he always spared enough time, to go through my write-ups, give me novel ideas and valuable suggestions to give a definite shape and pattern to the thesis. My discussions with him were highly enlightening. I express my deep sense of gratitude to him and I shall be grateful to him forever.
