ACKNOWLEDGEMENTS

This piece of work would never have been accomplished without the blessings and power of our God Almighty that works within me, and also without the people in my life inspiring, motivating guiding and accompanying me throughout this endeavor.

I own a deep sense of gratitude to my mentors Dr. Kamaljit Singh (Supervisor), and Dr. Paramjit Kaur (Co-supervisor), Professors, Department of Chemistry, Guru Nanak Dev University, Amritsar for their keen interest, constant encouragement, expert guidance, motivation and untiring efforts throughout the venture to accomplish my research work. I shall always cherish the memories of my association with them.

I must acknowledge the Department of Chemistry, Guru Nanak Dev University and its faculty, which has been instrumental for my academic achievements. I am highly thankful to the present Head & the previous Heads of the Department of Chemistry, Guru Nanak Dev University, Amritsar for providing necessary infrastructure for accomplishment of the research work. I also thank Prof. Koen Clays for recording of SHG data.

I am also grateful to the librarians & other technical and non-teaching staff of Department of Chemistry for providing administrative and other assistance during this period.

Ph.D. is an endevour completed in seclusion, but in practice it would not have been possible without the help and support from my dear friends (especially Kiran, Shivali and Talwinder), seniors and juniors. My sincere thanks go to all my friends & lab-mates for their generous support and co-operation.

Finally, I bow my head to my family for their generous support, positive attitude, invaluable blessings and selfless but untold sacrifices for my better and bright career. They were always there to support and encourage me through all the ups and downs without which it would have been impossible for me to finish this work.

Mandeep Kaur
