Acknowledgements

The journey from the starting of my research career to writing this thesis to obtain the Ph.D degree has been extensively supported by the encouragement and involvement of numerous people and organization whom I deeply acknowledge. I take this opportunity to present my sincere gratitude to the Department of Microbiology, University of Kalyani for allowing me to registrar myself as a student of Doctoral research work. Central Inland Fisheries Research Institute (ICAR), my workplace for the last five years has been another home for me. I greatly acknowledge this institute for giving me the chance to pursue my research career.

I would like to express my special appreciation and thanks to both of my supervisor Dr. Keka Sarkar, (Associate Professor, Department of Microbiology, University of Kalyani) and Dr. Sanjib K. Manna, Principal Scientist, Central Inland Fisheries Research Institute (ICAR). Dr. K. Sarkar has been a tremendous mentor for me. I would like to thank her for encouraging my research. Her advice on both research as well as on my career have been priceless. She gave me the continuous support in my Ph.D. study and research, through her patience, motivation, enthusiasm, and immense knowledge. Her guidance helped me in all the time of research and writing of this thesis. And Dr. S. K. Manna, all that I tell about him will bear an incomplete sense of a student teacher relationship. West Bengal is a place of immense political conflict, and we duo belonged to different political identities, but shared every square inches of ideologies and philosophies except politics. He gave me the pave of thinking scientifically, not only in research work, but also on daily life, customs, rituals, diets, nutrients and healthy way of living. Thank you, Sir!

It has been my privilege to work closely with Dr. Srikanta Samanta, Principal Scientist, Central Inland Fisheries Research Institute (ICAR). I have enjoyed the opportunity to watch and learn from his knowledge, experience and patience. His constant complaint of not having suitable publications from our side made me more
sincere of doing work of comparable standard. Whenever the computer of my lab
was busy, I used to sit in his computer, and thus I completed my essentials pre-
Ph.D. documents. Whenever I was hungry in the evening, He used to offer the
biscuits or puffed rice from his daily kitty.

I am deeply grateful to Dr. Anil P. Sharma, Director, Central Inland Fisheries
Research Institute (ICAR) for giving me the permission to enroll myself as a Ph.D.
student and providing research facilities needed for the work.

I would like to thank all the rest of the scientist of CIFRI, especially Dr. Md.
Aftabuddin, Praveen Murya, Dr. Ranjan Manna, Dr. Bijay K. Behera and Dr.
Sajina A.M. for extending their guidance, and generous help. I would also like to
thank all the staffs of CIFRI, especially Subhra di, Barmann babu, Suvendu da.

I express my heartful gratitude to Prof. Samir Kr. Mukherjee Professor, Department
of Microbiology, University of Kalyani, who has been a guiding force throughout
my course of Ph.D. I also take this opportunity to thank Ekramul Islam Assistant
Professor, Department of Microbiology, University of Kalyani.

My sincere thanks also goes to Honorable Vice-Chancellor, Prof. Rattan Lal
Hangloo, University of Kalyani for his help and guidance

The valuable and timely help of Dr. William B. Whitman, Head, Department of
Microbiology, University Of Georgia and Editor in Chief of the, Bergey’s Manual
of Systematic Bacteriology and Saravanaraj Ayyampalayam of Quantitative Biology
Consulting Group, University of Georgia made possible of performing and
analyzing the whole genome sequencing of two bacterial strains and also publishing
an announcement paper in a reputed journal. In this regard, I would also like to
thank all other members of the Quantitative Biology Consulting Group, University
of Georgia,
The funding of Indian Council of Agricultural Research and the guidance of National Bureau of Agriculturally Important Microorganisms (ICAR) was crucial in my research completion.

I am indebted to all my friends who have supported me over the last few years: Chinmay, Atalanta, Prasun, Moumita, Arpita, Debashri, and Papia. I have enjoyed many useful and entertaining discussions with all of my friends and co-workers.

My final word of gratitude goes to my family for which I find no word in the English dictionary to be appropriate and sufficient. I deeply regret not being able to attain the degree of Ph.D. in the presence of my beloved grandfather Rabindranath Maitra and Bindubhusan Mukherjee, my greatest inspiration and supporters, who are no more. My father Mr. Nikhilesh Maitra has acted as my mentor and always supported me in all possible ways despite having tremendous economical constraints. My mother Mrs. Swapna Maitra has been the most affectionate and played a model homemaker supporting my research life to a great extent. I also extend my gratitude to my relatives for their constant support.

To thank all my well-wishers in this little scope would be like evaluating the iceberg from the top, whose root is laid far beyond imagination. Likewise I apologize for not being able to name all those who have contributed in my research life in some form or the other.

Thank you!

Nilanjan Maitra
