ACKNOWLEDGEMENT

All praise to God Almighty for making it possible for me to get this far with regards to my education.

Looking at all the things I have had a chance to do thus far, I realize that many of those things (or maybe all of them) might never have happened if for not the people who have been involved in my life. I feel privileged to acknowledge these individuals for what I am and have right now.

First and foremost, I would like to acknowledge and thank my guide Dr. S. S. Kolekar for being the ideal advisor in his ability to be encouraging and understanding while having high expectations. He allowed me the freedom necessary to intellectually challenge myself but provided enough guidance that I was able to accomplish this work in the short time allotted. He is someone I truly admire and respect, not only for his professional ambitions and excellence, but also for his genuine concern and compassion for those around him.

I am very much thankful to Prof. (Dr.) N. J. Pawar, Honorable Vice Chancellor Shivaji University Kolhapur and Prof. (Dr.) S. R. Patil, Head, Department of Chemistry, Shivaji University Kolhapur for providing me the necessary facilities during the course of present investigation.

It is my great pleasure to thank Dr. (Mrs.) N. S. Chavan and Prof. (Dr.) M. A. Anuse for their invaluable guidance. I am also thankful to all faculty members of the Department of Chemistry for their guidance and help during my research work. I like to acknowledge Dr. P. S. Patil (Department of Physics) for initiating to extend the applicative area of my work.

I am very much thankful to Department of Atomic Energy (DAE) and Board of Research in Nuclear Science (BRNS) for fellowship.

The journeys without milestones are unfeasible. I would like to thank Mr. U. K. Sawant (B.S.K.K.V. Dapoli), Mr. G. B. Sathe (D. U. B. S. Science Collage, Dapoli), Mr. B. V. Mayekar and Dr. J. S. Sawant (Praj India Ltd., Pune) for being
milestones for me. I extend my thanks to Dr. Haldavanekar, Dr. Haldankar and Dr. Bhagat for their stimulating and supporting nature throughout my educational journey.

Words are insufficient to express my thanks to chemistry as well as physics laboratory colleagues who have always been there by my side. I wish to expand my gratitude to Rajendra, Kedar, Dipak, Daya, Anand, Anil, Amol, Shahaji, Shiva, Jasmin, Dipti, Tarannum, Dr. Sandip, Dr. Bapu, Dr. Dilip, Dr Uday, Dr. Swami and all my departmental friends who made this experience very unique.

Over the years I have been privileged of having a great amount of fantastic friends who have brightened my days and kept me going. I wish to thank you all! Especially Anil, Santosh dada, Sameer, Prasad, Sandesh, Kishor, Devendra, Trushant, Micky, Saurabh, Mayur, Prathmesh, Devashish, Sachin, Sunil, Sudhir, Tushar, Rahul, Bipin, Ajit, Abhijit, Sunny, Hemant, Yogesh, Aalia, Shilpa, Shital, Yogita, Varsha, Tejaswini, and Pooja are thanked for their long lasting friendship.

The credit of this thesis goes to my grandfather Mr. Vijayrao B. Salvi for their continuous moral support. I would like to express my warmest thanks to Mrs. & Mr. Parchure for being me a family member. I also thanks to Nalavade, Shelar and Sawant families for their remarkable support.

Finally, I am very much thankful to my strength, my brother Mr. Sidhesh & those, who are my world, who have given me life which I did not know I have, who was my light through hard times and who was my shadow when the light was going to my head, who gave me meaning, who took away my foolish pride. I am fortunate that it was my mother Mrs. Gitanjali P. Salvi and my father Mr. Pradeep V. Salvi, no-one else could have.

Thank you.

Prathmesh P. Salvi.
