Acknowledgments

First of all I express my love to my beloved husband and my mother in law with whose affection, support and constant blessings I could proceed with each and every work I wished to do.

I am so glad and lucky to have a person whom I met on the very first day of my entry into this prestigious university, my guide who impressed me with his inspiring talks and constantly smiling face. It is my proud privilege to acknowledge with respectful gratitude, the invaluable guidance extended to me by my guide Dr. O. P. Jasuja, Professor, Department of Forensic Sciences, Panjabi University, Patiala. It is his energetic encouraging words and ever smiling attitude that made me proceed with this study. I am thankful for his supervision, timely suggestions and constructive criticism during the course of study, without his guidance, it would not have been possible for me to complete this study.

I am highly grateful and obliged to Dr. N Khandelwal, Professor and Head, Department of Radiodiagnosis & imaging, Postgraduate Institute of Medical Education and Research, Chandigarh, not only as my boss but my co-guide also. I am looking for ways to summarize the contribution, he has imparted to this institute. He has always roofed our department with his strength and has encouraged each one of us to work with an endless strength. I still remember the day when I came across him for the first time. Such care and attention towards the duties is very rare to find these days. It is also worth mentioning that he maintains the same supportive nature with all his subordinates. He is our asset for the institution. We are really fortunate to have him in our midst. I look forward to him for the same kind of blessings always.
It is my pleasure to thank Dr. Dalbeer Singh, Head, Department of Forensic Medicine, PGIMER, Chandigarh for his all-time suggestions and support in doing my study and his valuable guidance in selecting the thesis protocol.

It would not have been possible for me even to start this study without the encouragement of Mr. S.C. Bansal, Lecturer, Department of Radiodiagnosis & imaging, Chandigarh, my Respected Teacher.

It would not have been possible for me to finish this study without the help rendered to me by Mr. Amitabh Sinha, Mr. Ashok Parmar, Mr. Mohan Lal Gupta, and Mrs. Neelam in collecting and compiling the entire data. The major and utmost important role in collecting data for my thesis work was played by registration and dispatch section staff of the department of radiodiagnosis. I am thankful to Mrs. Kiran Sharma, Mr. Prakash and Mr. Hardeep for their co-operation in this regard.

I would like to extend a special word of thanks to Dr. Vivek Gupta, Associate Professor, Department of Radiodiagnosis, PGIMER, Chandigarh who not only supported me in collecting the data but also corrected and checked the entire data.

(Gurdeep Kaur)
