CONTENTS

CHAPTER I : General Introduction and Review of Literature 1 - 16

CHAPTER II : Experimental model, Materials and Methods 17 - 32

CHAPTER III : Role of Gamma aminobutyric acid (GABA) in the control of gonadotropin and PRL release in OVX, conscious rats 33 - 41

CHAPTER IV : Role of Acetylcholine (Ach) in the control of gonadotropin and PRL release in OVX, conscious rats 42 - 48

CHAPTER V : Effects of Reserpine and α-Methyl-p-tyrosine on plasma gonadotropins, PRL and hypothalamic TH activity in OVX rats 49 - 55

CHAPTER VI : Effects of Arginine vasotocin, Bombesin and Secretin on gonadotropin and PRL release in OVX, conscious rats 56 - 65
CHAPTER VII : Effect of Luteinizing hormone releasing hormone (LHRH) on implantation and gestation in rats and the role of inhibin in gonadotropin and PRL release in adult and immature rats 66 - 78

CHAPTER VIII : Plasma gonadotropin, PRL levels and hypothalamic TH activity during estrous cycle, after ovariectomy and/or steroid priming 79 - 90

CHAPTER IX : General Discussion 91 - 100

Bibliography 101 - 134

Appendix 135
