List of Tables

1.1 Molecular formula and molecular structure of studied anthracene based molecules ........................................ 13
1.2 Physical parameters of studied anthracene based materials ................................................................. 13

4.1 Grain size (SEM) and RMS surface roughness (AFM) of thermally evaporated chlorinated anthracene based films deposited at different substrate temperatures ........................................ 63
4.2 Activation energies of chlorinated anthracene based films deposited by thermal evaporation technique at different substrate temperatures ................................................................. 69
4.3 Grain size (SEM) and RMS surface roughness (AFM) of hot wall grown chlorinated anthracene based films deposited at different substrate temperatures ........................................ 81
4.4 Activation energies of chlorinated anthracene based films deposited by hot wall technique at different substrate temperatures ................................................................. 87
4.5 Grain size (SEM) and RMS surface roughness (AFM) of thermally evaporated brominated anthracene based films deposited at different substrate temperatures ........................................ 100
4.6 Activation energies of brominated anthracene based films deposited by thermal evaporation technique at different substrate temperatures ................................................................. 105
4.7 Grain size (SEM) and RMS surface roughness (AFM) of hot wall grown brominated anthracene based films deposited at different substrate temperatures ........................................ 112
LIST OF TABLES

4.8 Activation energies of brominated anthracene based films deposited by hot wall technique at different substrate temperatures. . . . . . . 121
4.9 Grain size (SEM) and surface roughness (AFM) of thermally evaporated aminoanthracene based films deposited at different substrate temperatures. . . . . . . . . . . . . . . . . . . . . . . . . . . 133
4.10 Activation energies of aminoanthracene based films deposited by thermal evaporation technique at different substrate temperatures. 137
4.11 Grain size (SEM) and surface roughness (AFM) of hot wall grown aminoanthracene based films deposited at different substrate temperatures. . . . . . . . . . . . . . . . . . . . . . . . . . . 146
4.12 Activation energies of aminoanthracene based films deposited by hot wall technique at different substrate temperatures. . . . . 155
4.13 Parameters of anthracene based molecular devices. . . . . . . . . 160
